

Self-care oral care caddy

Engage patients and residents in helping prevent NV-HAP

Infection Prevention

Practicing consistent oral care removes microbes and is proven to significantly reduce non-ventilated healthcare-associated pneumonia.^{1,2,3} Our new oral care caddy helps engage your patients and residents in their own care by helping them remove oral bacteria simply and effectively and help reduce the incidence of NV-HAP.

This self-contained, economical kit contains all the essential items needed to help perform successful oral care at the bedside or in an ambulatory setting. This includes DuoCare™, a powerful 2-in-1 oral rinse that combines a soothing moisturizer with an effective antiseptic—0.1% cetylpyridinium chloride or CPC.

Advantages:

- Built-in rinse receptacle
- Educational packaging and barcode help drive oral care compliance
- Each caddy provides necessary supplies for up to one week

MDSNV0DC
