

LTC Universal Bed Transporter

HCPCS:

FIGURE A

FIGURE B

FIGURE C

FIGURE D

- One versatile transporter works with all Drive LTC bed models (P503, P703, P903, P750).
- Reduces caregiver strain and risk of injury by eliminating the need for manual lifting or pushing heavy beds.
- Saves time and effort with fast, tool-free attachment and removal.
- Enhances workflow efficiency, allowing caregivers to move beds quickly and safely throughout the facility.
- Improves overall safety and control during transport with precision connection points that secure each bed in place.
- Supports smoother navigation across various flooring surfaces, even in tight or crowded spaces.
- Delivers long-term value with a durable, low-maintenance design built for everyday use in LTC environments.
