

# ComfortGlide® TRP Patient Repositioning System

Empower staff to safely move patients and reduce caregiver injury risk.

## Safely boost, turn and reposition patients

The standard ComfortGlide Patient Repositioning System gives caregivers all the tools to accurately follow their facility's safe patient handling requirements and provides proper offloading and moisture management for better patient outcomes.

## Caregiver benefits

- Repositioning sheet helps reduce the risk of injury

## Patient benefits

- Wedges provide the NPIAP recommended angle for offloading
- Moisture management pad absorbs and traps moisture
- Better patient experience and outcomes
