

# Nitrile Sterile Exam Gloves

Choose the right glove for the right task

**Enhance  
results,  
optimize  
efficiency**

# Ensure patient and staff protection while optimizing budget efficiency

Did you know that sterile exam gloves and surgical gloves are often misused and incorrectly interchanged throughout hospitals and facilities? Choosing the right glove for the right procedure can make all the difference in improving outcomes and streamlining costs.

## When to use sterile exam gloves

Sterile exam gloves are needed when the potential spread of infection is high and when healthcare professionals come into contact with broken skin, body orifices, body fluids and internal organs. Staff from multiple departments can don sterile exam gloves for many uses, including minor tasks and procedures.

Department	Usage
Inpatient (general)	Catheter placement, line placement, parenteral nutrition, trach tube placement, trach tube dressing change, dressing changes, bed sores/open wound care, aspiration, pleural drainage placement, chemotherapy, dialysis, sterile dressing change, suture placement, pathology collection
Pre-op	Catheter placement
Post-op	Pleural drainage management, chest tube management, mediastinal chest drain management, sterile dressing change
ED	Open fracture care/set, trach tube placement, sterile dressing change, suture placement
ICU	Catheter placement, line placement, parenteral nutrition, trach tube placement, trach tube dressing change, dressing changes, pleural drainage management, chest tube management, sterile dressing change, suture placement
NICU	Line placement, trach tube placement, trach tube dressing change, parenteral nutrition, sterile dressing change, suture placement
CICU/CVICU	Pleural drainage management, chest tube management, mediastinal chest drain management, sterile dressing change, suture placement
Lab	Biologic/pathology handling, culture/media handling, petri dish/slide handling and prep
Surgical	Room turnover, site prep, room prep, C-arm drape/cassette holder drape adjustments
Radiology	Sterile site prep (spinal tap/lumbar puncture, interventional radiology procedures), aspiration, biopsy, room prep, fluoro-guided injections (arthrogram), HSG, myelogram
L&D	Site prep (epidural), sterile dressing change, lumbar puncture, suture placement
Pain Management	Site prep, sterile dressing change
GI Lab	Pathology handling (ERCP, colonoscopy, scoping procedures), room prep, site prep

# Sterile exam gloves for everyday tasks and procedures

Gloves are among the most essential items in your supply budget. Using the right glove for the right procedure can promote better care and also maximize your supply budget. Allow us to assist you in identifying where your staff may be using surgical gloves when a more cost-effective sterile exam glove could be appropriate.

- **Material choices**—Available in nitrile, vinyl and latex
- **Extended cuff**—Available with a 12" long extended cuff for greater coverage
- **Cost-effective alternative**—A more affordable option compared to surgical sterile gloves
- **Available as singles or pairs**—For flexibility based on the needs for the specific task
- **Textured fingertips**—Enhanced grip for handling all types of devices and products
- **Meets or exceeds industry standards**—Designed to meet or exceed ASTM, EN and ISO standards for exam gloves
- **Superior pinhole quality**—Acceptable quality level for pinholes exceeds FDA standards

Textured fingertip for optimal performance in sterile settings

Better grip

Greater protection against spills and splashes

## Common uses:

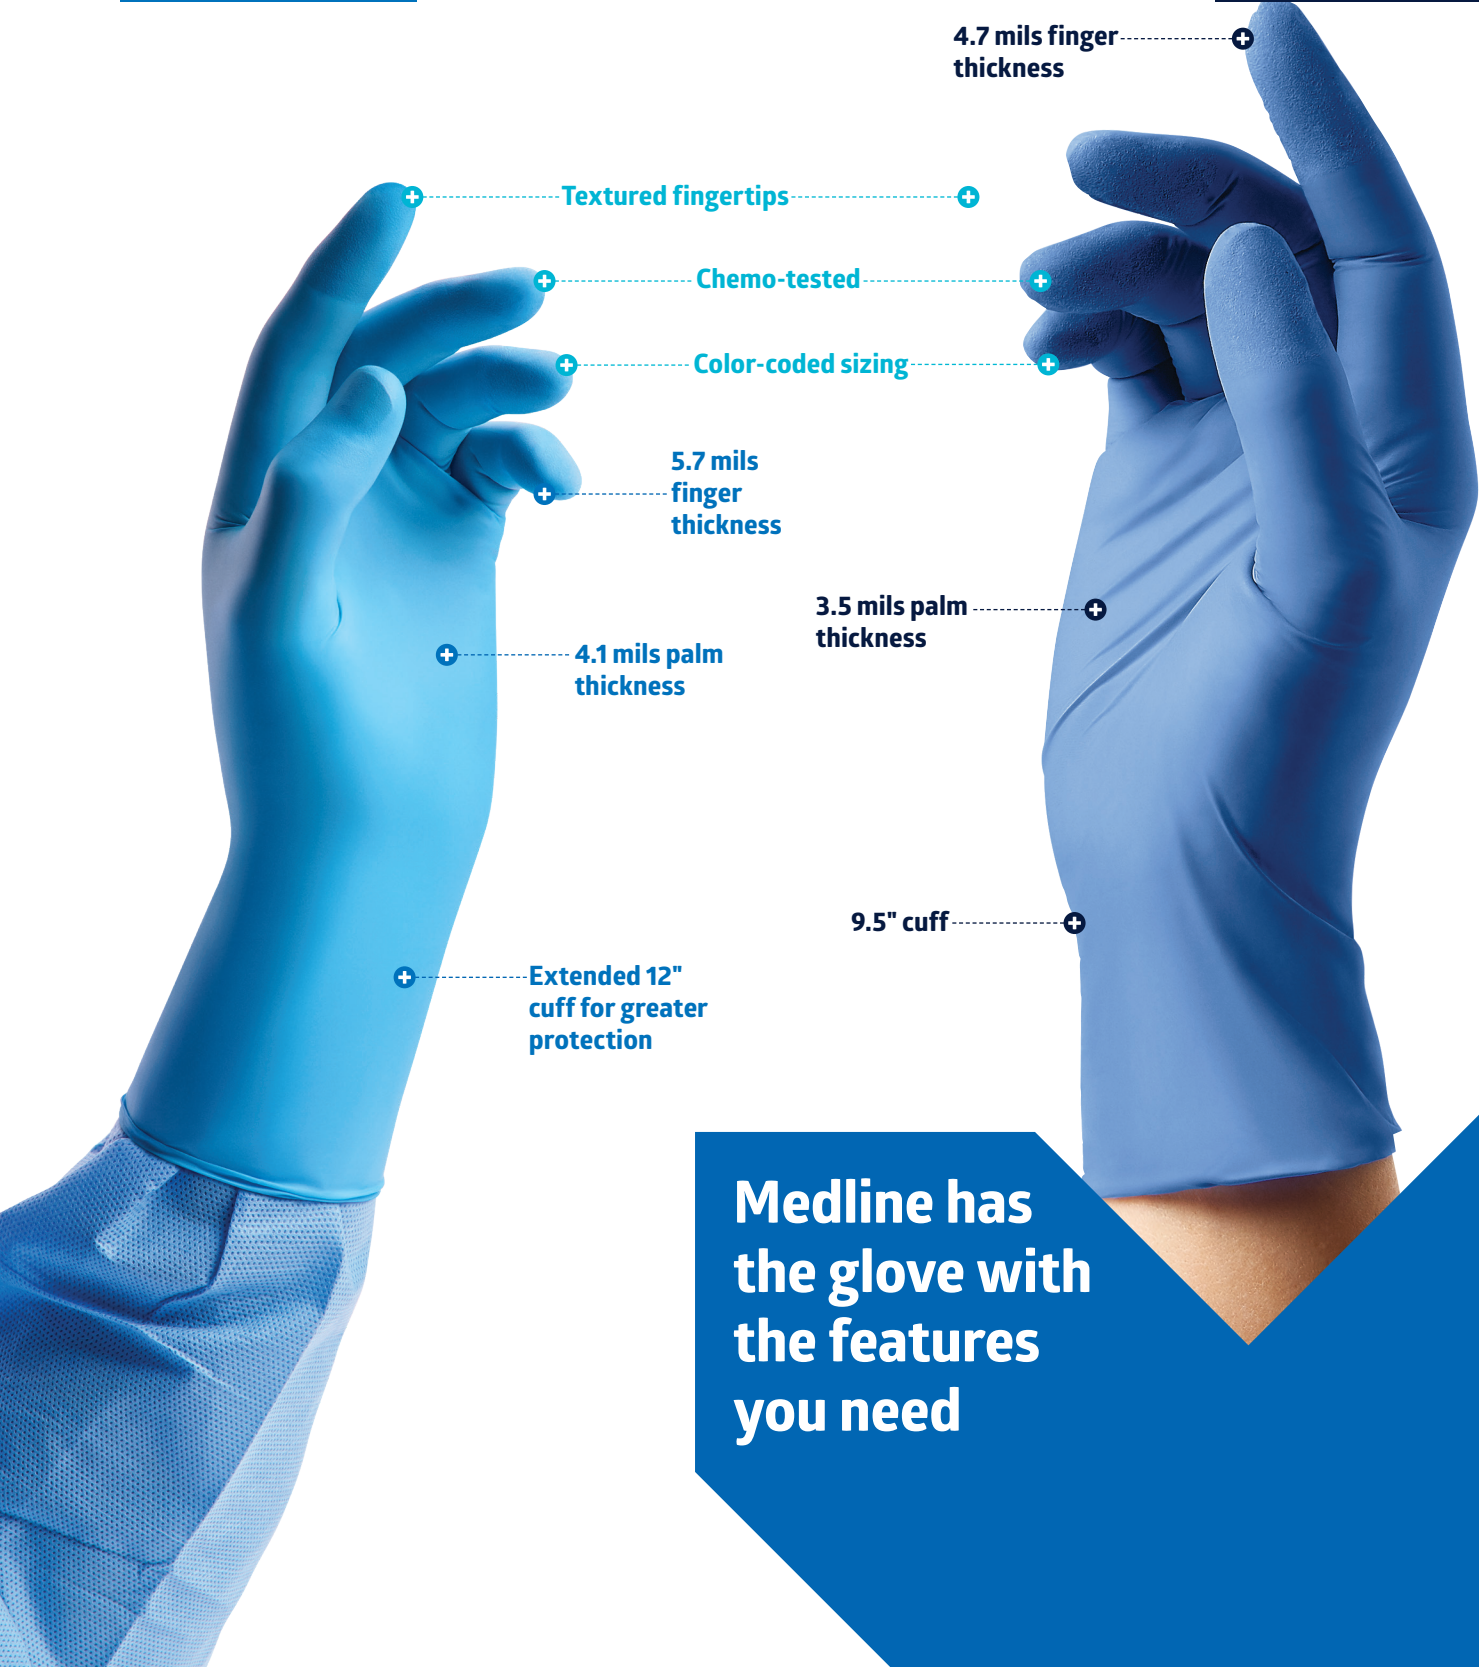

Catheters, L&D, checking dilation, wound dressing changes, pharmacy, compounding drugs, pre- and post-op room prep (in sterile field), lumbar punctures, bone marrow tests

# AloeTouch® Exam Gloves

Care for your caregivers with powder-free therapeutic exam gloves. AloeTouch gloves are coated on the inside with pure, organic freeze-dried aloe vera that helps soothe hardworking hands as they protect. Choose 3G synthetic vinyl or ICE nitrile exam gloves.

Vinyl exam gloves use stretch synthetic technology for good tactile sensitivity with unique softness and flexibility.

Nitrile exam gloves are a lightweight therapeutic solution with excellent sensitivity, dependable protection and strength. Meets ASTM requirements for barrier protection and quality.\*

- **Aloe coating**—Helps soothe hands with an added layer of comfort
- **Fully textured grip**—Provides better grip and performance
- **Moisture-resistant packaging**—Easy-to-open plastic packaging resists moisture, and the smaller size saves storage space
- **Cuff options**—Available in both 9" and 12" cuff lengths
- **Material choices**—Available in vinyl and nitrile

\* When used in accordance to the guidelines set forth in the USP 800 chapter. Tested chemotherapy drugs available upon request.
