

The background of the advertisement is a photograph of a mannequin's head and neck. The mannequin is wearing several medical restraints: a white fabric hood covering the face, a white fabric strap around the neck, a blue fabric strap with a white buckle around the neck, and a yellow fabric strap with a white buckle around the neck. The restraints are arranged in a way that demonstrates their use on a patient's head and neck.

Patient Restraints
Solutions for crisis intervention readiness

SAFETY MATTERS.

Protecting patients and staff is a high priority. If a patient becomes aggressive or confused, they could endanger themselves or a staff member. Is your facility prepared for crisis intervention? We can help.

Joint Commission Standards recommend using the least restrictive form of restraint.¹ Our selection of patient restraints helps you provide security and safety, including your choice of comfortable fabric and closure options. Plus, we offer educational tools to train your staff on the proper use of restraints, for more confident patient care.
