# Liners, Hampers and Trash Cans

# How to choose the right bag

What's the difference between a low-density and high-density liners?

VS.

## Low Density

- Think “trash liners at home”
- Measured in mils
- Superior stretch for heavier items
- Waste type: heavy waste (i.e. linens, food, waste and sharp objects)

## High Density

- Think “plastic grocery store bags”
- Measured in microns (mics)
- Less material so it's less expensive
- Waste type: soft waste (i.e. tissue paper, paper towels and heavy, not sharp waste)

## Helpful hints on selecting can liners

To convert mil to microns, multiply the mil by 25.4 to arrive at true micron thickness.

## How to measure for correct can liner size

**Bag width:** Half the outer circumference of the container.

**Bag length:** For round containers, use the height of the container, plus half of the diameter of the bottom, plus 3" (for overhang).

For square or rectangular containers, use the diagonal of the container bottom, rather than the diameter.

Types of waste	Thickness (mil)						
	Low density high mil	Low density med mil	Low density low mil	High density high mic	High density med mic	High density low-med mic	High density low mic
Heavy sharp objects	●						
Average weight sharps, broken glass		●					
Lightweight waste with sharp corners			●				
Rough cafeteria waste, sharp objects		●	●				
General food waste			●	●			
Heavy paper (i.e., newspaper, magazines)				●			
Terries, linens, microfiber				●	●		
General mixed restroom waste						●	
Tissue paper							●

## Have you heard of our value add program?

This program is a way for customers to get hampers or trash cans free of charge based off their liner usage and price.

- Standard Agreements are usually about 3 years long
- Customers agree to buy a certain amount of liners per month at a set price. **Based off of that usage and price we can give them a certain number of hampers or cans free of charge**

Reach out to your Medline Representative for more information.

# Floor Pads

## Rethink your floor care from the ground up

### Do I have the right floor care routine in place?

To clean, protect and prolong the life of your floors, they need the right care at the right time—and frequency is everything. There are **four** traditional floor care procedures:

#### Buffing and Polishing

- Removes embed dirt and soil from a floor surface and refreshing the shine
- **Frequency: daily/routine use**

#### Burnishing

- Smooths away scratches that could capture dirt and pops shine
- **Frequency: 3x a week**

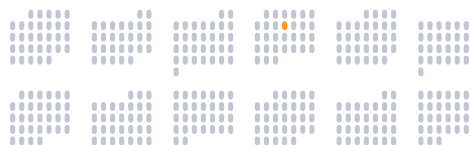

#### Scrubbing and Cleaning

- Removes embedded dirt and soil from top layers of floor surface without stripping
- **Frequency: weekly/bi-weekly**

#### Stripping

- Removes layers of finish or sealer from the floor surface
- **Frequency: restorative**

### Not sure which floor pads to use with your machine?

# Carts and Containers

# Custom Cart Covers

Providing the proper fit and coverage requires custom sizing your cart covers.

We've streamlined our ordering process to make it easier than ever to get the exact custom cart covers you need. Plus, they're built to last, with strong double-stitched reinforced vinyl and heavyweight nylon materials.

**You can create custom covers for virtually any equipment in your facility, including:**

- Polyvinyl Bulk Trucks
- Tilt Trucks (covers and liners)
- Housekeeping Carts
- Utility Carts
- Computer Carts
- Beds in storage
- ...and more

# 1 Choose your cover type

Vinyl pocket

Grommets for locking

Reject linen pouch with silk screen

## Standard Covers—available in nylon or vinyl to help protect the product

Standard covers have a single front flap that's fastened shut with either zippers or hook-and-loop closures. Also available without a flap.

Silk screening is available as a custom extra

### Easy-Grab Covers—convenient access and permanent protection

- Keep your linens covered at all times with Clear view vinyl window strips
- Vertical panels let you easily see what you're grabbing
- No flaps to close—linens are never left uncovered
- Vinyl can be wiped down with a disinfectant and Nylon can be laundered on 110° F–130° F and tumble dried low; do not autoclave

### Half-Cart Covers—for poly bulk trucks

- Only a 12" cover on the sides and back is needed to hold this durable cover in place—plus a full front flap to cover the opening

Options include:

- Hook-and-loop to secure the front flap to the cart
- Elastic corners for a more snug fit
- Silkscreen your logo on the flap to market your business

Easy access to linens

Removable window strips for trouble-free laundering. Easily replaced if damaged or lost.

Reinforced corners

Elastic corners available for a more snug fit

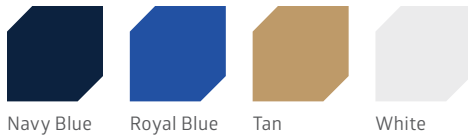

## 2 Select your material and cover

### Standard, Easy-grab Covers—420 Denier Nylon Color Options

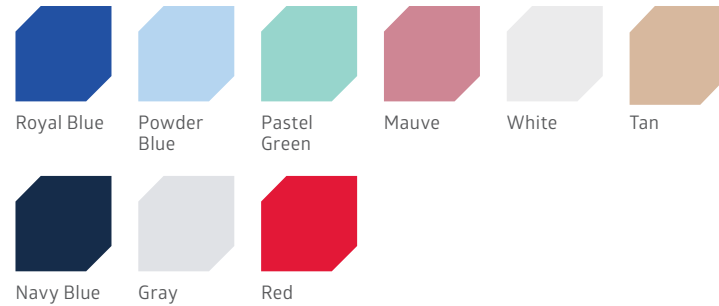

420 denier nylon (Khaki)

### Standard Covers—600 Denier Nylon Color Options

600 denier nylon (Royal Blue)

### Standard, Easy-grab Covers—11-oz Vinyl

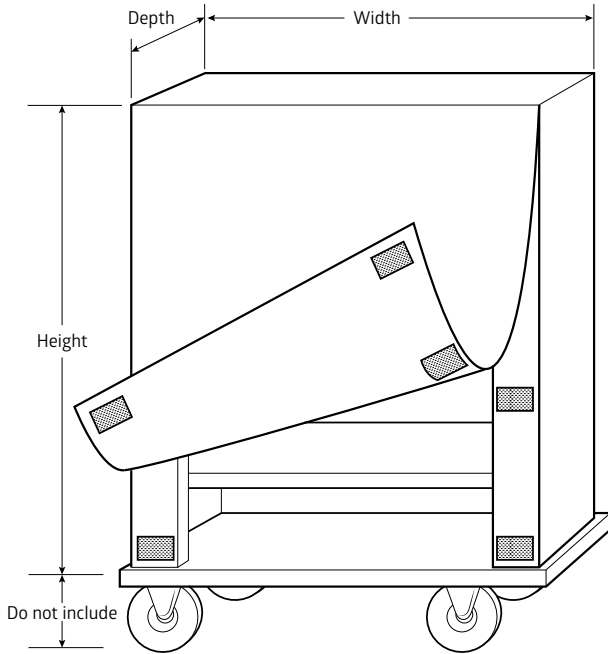

11-oz vinyl (Pastel Green)

Colors are reproduced as faithfully as the printing process allows. Please contact your Medline Representative for fabric samples to ensure satisfaction.

### 3 Measure your cart

Do not include casters when measuring height

### 4 Indicate your closure type

For standard covers only

None

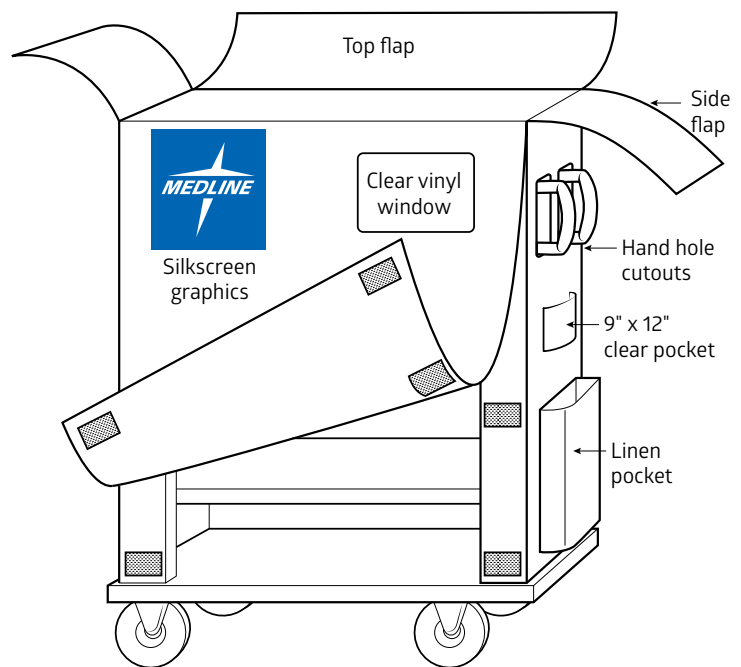

Zipper closure

Hook-and-loop closure

### 5 Add your extra options

Cutouts, pockets, graphics or windows can be located just about anywhere.

# Make It Your Own (MIYO) Housekeeping Carts

## Professional tools for high-level cleaning

Designed for healthcare, MIYO carts stand up to disinfectants, power washing and even autoclaving. Configure yours to have up to eight locking locations to help keep personal items, chemicals, supplies and trash secure. All carts include hanging tool kits and the accessories shown. Additional accessories are sold separately.

- Precisely engineered, durable copolymer components are quieter and lighter than metal carts
- Dome lids feature hydraulic pistons for silent closure
- Polymer casters swivel silently and provide maximum maneuverability
- Co-polymer, closed-cell material combined with rounded edges makes carts easy to clean and disinfect
- Sturdy, durable, lightweight and resistant to rusting and denting

## UV-C Dosimeters

- Provide a visual indication of germicidal irradiation at four dose levels: 25, 50, 75 and 100 mJ/cm<sup>2</sup> for optimal UV-C disinfection
- Dots react to exposure from UV-C devices at 254 nm and change color to indicate the intensity of the dose delivered
- After exposure the accumulated dose can be determined using the included Color Reference Chart
- For best results, take exposure readings immediately after a disinfection cycle
- Dots are 1" diameter with adhesive backing

# Reusable Underpads

## Quick Dry Poly Laminated Reusable Underpad

- Face fabric on underpads quickly wicks fluid and is dry to the touch in minutes
- Unique blend of fibers in the soaker layer help absorb and distribute fluid more effectively
- Breathable polyurethane film helps block fluid, but allows moisture vapor to escape, creating a cooler, drier and more comfortable patient environment
- Bonded construction thins the pad for less bulkiness with no decrease in absorption
- Lays flat with no bunching or rolling

Item No.	Description	Pkg.
MDTIU8SEFBLU	34" x 36", 100% Brushed Polyester, Green Face/Blue Barrier, Heavy	1 dz/cs

## PerforMAX™ LT Reusable Underpad

- Breathable polyurethane film helps block fluid, but allows moisture vapor to escape, creating a cooler, drier and more comfortable patient environment
- Swift-Dry top layer wicks fluid in quickly and moves it to the center core
- Super absorbent core disperses fluid throughout the pad so the top feels dryer quicker
- Bonded construction thins the pad for less bulkiness with no decrease in absorption
- Lays flat with no bunching or rolling

Item No.	Description	Pkg.
MDTIU7SEFBLU	34" x 36", Poly, Moderate Soaker, Green Face	2 dz/cs

## PerforMAX™ Reusable Laminate Vinyl Underpads

- Contains all the absorbent and stain-free features of the PerforMAX LT, but is fabricated with a laminate vinyl film instead of the polyurethane layer in the PerforMAX LT
- Swift-Dry top layer helps wick fluid in quickly and moves it to the center core
- Super-absorbent core helps disperse fluid throughout the pad so the top feels dryer quicker
- Bonded construction helps "thin" the pad for less bulkiness with little decrease in absorption
- Lays flat with minimal bunching or rolling; resists stains for more uses per pad

# Mattress Covers and Encasements

## What is the difference between covers and encasements?

### Covers

- Fits like a traditional contour sheet to protect top of mattress
- Easy application and removal for cleaning
- Ideal for beds with higher patient/resident change over
- Protects mattress from wetness and staining
- Processes easily in a regular commercial-style machine or an industrial laundry

### Encasements

- Envelopes entire mattress in protection with zip closure and lock
- Ideal for long-term residents
- Allergen-blocking and bed bug protection, as well as water resistant to prevent wetness and staining
- Processes easily in a regular commercial-style machine (not intended for industrial laundry)

## Frosthite Cover and Encasements

- First defense to improve the longevity of your mattress
- 3-gauge vinyl

# Roller Shades

Modern designs manage light, privacy and energy efficiency

Easy  
to clean

## Smart design on a roll

Roller shades complement any décor, combining upscale design with low maintenance. They're a simple way to elevate the look of your space while delivering a major impact on comfort and energy efficiency.

## Control your environment

Manage the sun's heat and light with interior solar shade fabrics. Choose from a wide selection to help protect your furnishings from UV damage and improve patient and staff experience by reducing glare.

## Manage privacy

Tighter fabric weave shades keep light out and provide greater privacy for patient and exam rooms, offices and meeting rooms. Our dual shades offer a sunscreen fabric shade and blackout shade, on the same window.

## Elevate energy efficiency

Roller shades help conserve energy year-round. In the winter, they keep heat from escaping, while in the summer, they help control the heat coming into your facility. They also allow for more natural light further reducing energy use.

From the finest fabrics to uniquely engineered mechanicals and comprehensive design consultation, we have you covered.

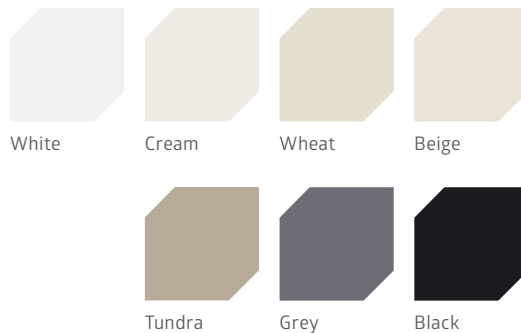

## Let us manage your project from start to finish

From design consultation through implementation, our on-staff experts can manage your project every step of the way.

# Cleaning Guide for Patient Rooms

## 1 Prepare to enter the room

- Perform proper hand hygiene.
- Put on protective apparel such as gloves. Before going into isolation rooms, put on additional personal protective equipment.
- Announce your presence before entering the room.

**Product recommended:** CRI4000 (Classic Cover Lightweight Polypropylene Gown)

## 2 Enter the room

- Survey the room for anything that doesn't belong. If you find something, contact the nursing staff about removing it.
- Inspect the privacy curtains. If the room was just used for isolation, or if the curtain is visibly soiled, contact the manager to arrange for cubicle curtain replacement.

**Product recommended:** MIT6DSEREN (Medline Disposable Snap Panel Cubicle Curtain)

## 3 Dispose of waste

- Remove soiled linens.
- Keep hazardous waste separate (i.e., soiled linen, infectious waste, infectious linens).
- Dispose of liners, making sure to close, twist, and tie a knot in the liner while it's still in the trash can. (**NOTE:** Watch out for sharp objects. Never put your hand into the bag or push on it.)

**Product recommended:** NON023143 (Soiled Linen Liner) and other Medline Trash Liners

## 4 Dust the room

- Remove gloves, apply hand hygiene and put on new gloves.
- Start dusting near patient bed and then move outwards (do not dust in occupied ICU/CCU patient rooms).

**Product recommended:** MDT217750 (Microfiber High Duster)

## 5 Wipe high-touch surfaces

- First remove soils and residue with a microfiber cloth or one-step germicide.
- Then apply disposable disinfectant wipes. Use a new wipe for each surface to avoid cross contamination. If a surface starts to dry before the contact time (printed on the disinfectant), apply more product until the correct amount of time has passed.
- For rooms used for isolation, ask the nursing staff if additional cleaning is needed. To kill *Clostridium difficile* (*C. diff.*), a bleach or peracetic acid disinfectant or wipe is needed.
- Only use disinfectants on approved surfaces as directed on product label.

## 6 Begin cleaning the bathroom

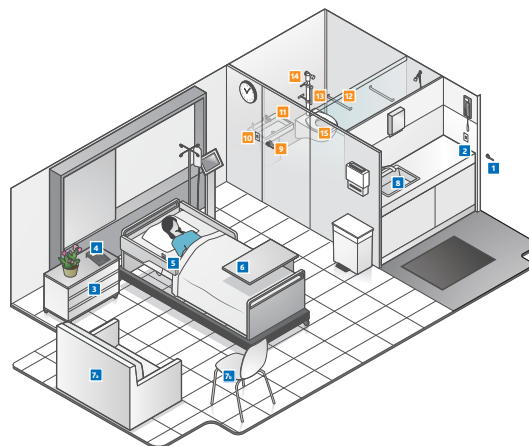

- Clean the mirror.
- Disinfect the rest of the bathroom, including: toilet bowl, flushers and seat, sink and countertops, shower, hand rails, and fixtures.
- For tougher stains, use heavy-duty products, such as a more acidic toilet bowl cleaner, foaming acid shower cleaner, or a crème cleanser for soap scum, scale and rust.
- To remove stains and odors from urine, an odor digester/eliminator is recommended.
- Refill soap and lotion dispensers and wipe the outside of these containers.

## 7 Sweep and mop the entire floor

- Work from the furthest corner to the entrance.
- Sweep the floor.
- Mop using a disinfectant or neutral floor cleaner.
- Change the solution every three rooms. For heavier soils, use a general purpose cleaner.

## 8 At the end of the day

- Clean the cleaning tools.
- Remove mop heads and cloths to be washed.
- Wipe down spray bottles.
- Clean the mop and cart handles.
- Dispose of trash in the proper bins.
- Dispose of gloves and wash hands.

**Products recommended:** MSC351300 (Micro-Kill One Germicidal Alcohol Wipes) and MSC351400A (Micro-Kill Bleach Germicidal Bleach Wipes)

**Products recommended:** EVSCHEM430 (Toilet Bowl Cleaner), EVSCHEM410 (Mild Abrasive Cream Cleanser), EVSCHEM480 (Uric Odor Remover) and EVSCHEM200A (Multi-Surface Glass Cleaner)

**Product recommended:** EVSCHEM210 (Neutral Floor Cleaner) and MICROINSKIT1 (Microfiber Starter Kit)

**Product recommended:** EVSCHEM230 (Multi Surface Peroxide Cleaner)
