

Drug Buster®

The fast, effective, eco-friendly drug disposal system

Benefits

- Minimizes the potential for poisoning or abuse by breaking down unwanted non-hazardous medication
- Fast, convenient process gives nurses more time to care for patients
- Provides a solution to meet the requirements of the DEA's "non-retrievable" definition for controlled substances¹

Eco-friendly

- Eliminates unwanted non-hazardous medications before they can leach into the environment
- Decreases the amount of non-hazardous pharmaceuticals that enter our water supplies
- Offers an environmentally safe practice to dispose of non-hazardous medications in accordance with the EPA's guidelines²

Drug disposal takes only three easy steps

Dispose

Place unwanted non-hazardous medication—pills, liquids and transdermal patches—into the bottle

Shake

Shake bottle vigorously for 1 minute

Discard

Discard the bottle in regular trash*—not hazmat

* Drug Buster utilizes a patented formulation that, through the process of adsorption, renders non-hazardous and non-classified product non-retrievable and can be disposed of in the trash immediately. Classified products are rendered non-retrievable and can be disposed of after 96 hours. All facilities must identify and manage hazardous and classified drug waste to the guidelines set forth by their federal, state, local and tribal regulations for drug disposal.
