Your Partner in Research and Manufacturing

WELCOME TO MEDLINE

Founded in 1966, Medline's roots date back to 1910 when A.L. Mills, the great-grandfather of the current CEO and President, started sewing butcher's aprons in Chicago. He was soon approached by nuns from a nearby hospital and offered to help them make surgeon gowns and uniforms.

Since then, Medline has grown into the largest privately held manufacturer and distributor of health care supplies in the United States. Headquartered in Mundelein, IL, the company continues expanding its product line and reach.

Today, Medline provides more than 350,000 different products to life science and research institutions, pharmaceutical and medical device manufacturers, healthcare providers, animal health markets, career colleges, retail outlets and contract OEM partners.

While Medline has produced hundreds of catalogs in our history, we're pleased to introduce our first catalog specifically for the life science and pharmaceutical communities, with a focus on research, laboratory and manufacturing activities. However, we're not "just" a catalog company. Our nationwide team of specially trained representatives stands ready to call on your facility and help you with whatever supply needs you have.

Until we meet you face-to-face,

Medline Protective Sleeve Covers

- Microporous sleeves are made from white, microporous breathable laminate material which is impervious per ASTM F1670.
- For additional protection, Prevention Plus sleeves are made from an impervious and breathable material consisting of a hybrid film laminated between two layers of bi-component spunbond material. This results in impervious yet breathable protection.
- Covers are 20" and are made with elastic bands at both ends for wrist to upper arm coverage and a snug fit.

Item No.	Description	Pkg

Medline offers 4 different gown fabrics, which gives your facility the most choice. Medline gowns provide a wide cut in the chest and sleeves. The extra room makes them more comfortable. The long neck closure also allows for more adjustability in the chest area. All Medline gowns are latex-free. Medline gowns are color-coded by protection levels on the package insert, neck binding and gown pass card.

Eclipse® Gowns

Made of the latest SMS technologies, Eclipse gowns offer outstanding softness and enhanced breathability

- Sterile, SMS gown with AAMI level 2 protection
- This lightweight fabric has great moisture evaporation, leaving the wearer cool and dry

Item No.	Description	Pkg
DYNJP2005	Small (41", 104cm)	30/cs
DYNJP2001	Large (43", 109 cm)	30/cs
DYNJP2002	X Large (47", 119 cm)	30/cs
DYNJP2003	XX Large (49", 124 cm)	18/cs
DYNJP2004	3XL (50", 127 cm)	18/cs

Sterilization Indicators

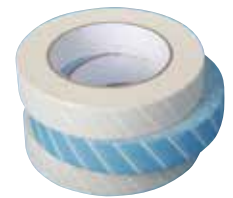

Sterilization indicator confirms sterile parameters have been achieved.

- Steam indicator strips change from blue to black and not reversible. Use for gravity and vacuum cycles.
- Steam integrator strips measure the time, temperature and presence of steam in steam sterilizers with an irreversible and distinctive color change from purple to green.
- Bowie Dick packs detect air leaks in a pre-vacuum steam sterilizer at 270°F (132°C) at a minimum 3.5-minute exposure. Irreversible indication from blue to black.

Item No.	Description	Pkg
MDS200100	Steam Indicator Strip	250/bx
MDS200600	Steam Integrator Strip	250/pk
MDS200400	Bowie Dick Test Pack	30/cs

Autoclave Tape

Seal bags, bottles, packs or wraps with this adhesive tape.

- Visually indicates that pack has been exposed to the steam sterilization cycle.
- Shows an irreversible and distinctive color change from beige to black.

Item No.	Description	Pkg

Autoclavable Bags and Holders

Autoclavable bags come in a variety of colors and sizes to match your application, and biohazard bags include a sterilization indicator patch.

- Clavies® bags are durable .05mm thick PP bags. These transparent bags are steam autoclavable at 135°C (275°F).
- Standard Biohazard bags are 1.5 mil thick and are made from virgin-grade polypropylene. These bags feature a pre-printed sterilization indicator patch, which darkens when bag is autoclaved. These red-colored bags are labeled with the standard biohazard warning symbol and precautionary protocols in four languages: English, French, German and Spanish. Bags can be autoclaved at 135°C (275°F).
- Super Strength biohazard disposal bags offer maximum protection against dangerous tears and leaks. The orange-red bags display the standard biohazard warning symbol and precautionary procedures in four languages; English, French, German and Spanish. Durable, extra heavy-duty bags are 2 mil thick blended polymer, autoclavable to 121° C (250° F) and feature a sterilization indicator patch that darkens when autoclaved.
- Sturdy wire holder keeps bags open while a separate hooked ring that rests over the top keeps them securely in place. Made from bright biohazard orange colored epoxy-coated wire.

BRT131890000	14.6" dia x 29.5" H (37 cm x 75 cm), fits bag size 24" x 36" (61 x 91 cm)	1/ea

Recloseable/Freezer Bags

Ideal for clean and convenient storage.

- Features a white block for clear labeling
- Made of durable 2 mil low-density, polyethylene plastic
- Available in a variety of sizes

Whirl-Pak® Sample Bags

Saves space over other sample containers

- By whirling or tightly folding the tab over three times, the Whirl-Pak® bag becomes a leakproof container.
- Bags handle temperatures up to 180 °F (82 °C), and can be frozen to any temperature, even liquid nitrogen - careful handling required after freezing.
- All bags are sterilized after manufacturing.
- Write-on version features a strip making sample identification easier and more convenient. The paper-like finish virtually eliminates ink smearing, and provides a surface that will accept a variety of writing instruments (e.g., pen, pencil, felt-tipped marker)

Medline Bags and Liners

Color, size and thickness for all your needs

All Medline liners have a Star Seal/X-Seal bottom, which is the strongest part of the bag. Our seal stands up to almost anything. Here is a list of our most popular liners. If you can't find the bag you need, please check with your Medline Sales Representative or call 1-800-MEDLINE.

The X-SEAL design

- Improvement over traditional flat-sealed or gusseted bags, because it has no weak spots along the bottom seal where leaks could occur.
- Conforms easily to your container, distributing refuse evenly around the bag for maximum carrying capacity.

A&D GF-Series Precision Balances

User friendly, fast response, and superb accuracy

- Super Hybrid Sensor (SHS) technology provides ultra fast responses, as quick as 1 second
- Modular sensor construction for lower ongoing maintenance and repair costs
- External calibration
- GLP/GMP/ISO compliant output of date, time, user-assigned balance ID, balance serial number and calibration data to computer or printer
- RS-232 standard serial interface; data memory function; 40 sets of weighing data with 20 sets of unit weight for counting mode
- Compact footprint for easy placement anywhere 210 x 317x 86 mm (8.27" x 12.48" x 3.39")
- Pan dimensions 128 x 128 mm (5.04" x 5.04") for 200 to 1000-g models, 165 x 165 mm (6.5" x 6.5") for 1200 to 4000-g models
- Splash resistant keyboard, easy-to-read fluorescent display and convenient front bubble leveling
- Standard underhook, ideal for density determination and weighing magnetic substances
- Units of measure include decimal ounce, Troy ounce, pennyweight, carat, momme, grain unit, pound and pound/ounce. Number of samples in Counting mode are 10, 25, 50 or 100 pieces.
- Operating temperature 5-40 °C (41 to 104 °F), non-condensing relative humidity 85% or less
- Sensitivity drift +/- 2ppm / °C

A&D Gemini™ Series Analytical Balance

Internal calibration, large breeze break and compact footprint

- Full Digital Calibration simplifies calibration by eliminating the need to continuously load and unload calibration weights to adjust Zero and Span
- Internal calibration with built-in, motor-driven calibration mass
- GLP/GMP/GCP/ISO compliant balance management. Outputs date, time, user-assigned balance ID, balance serial number and calibration data
- RS-232 bi-directional interface for use with PC, printer or remote display
- Data memory function stores 200 pieces of weigh data
- Time and date function complies with GLP and interval weighing within the data memory function
- Underhook capability for density measurement and weighing large or magnetic materials
- Compact footprint for easy placement anywhere 249 x 330 x 327 mm (9.80" x 12.99" x 12.87")
- Breeze break dimensions 178 x 160 x 233 mm (7.01" x 6.5" x 9.17")
- Pan diameter 85 mm (3.34")
- Units of measure include decimal ounce, Troy ounce, pennyweight, carat, momme, grain unit, pound and pound/ounce
- Operating temperature 5-40 °C (41 to 104 °F), non-condensing relative humidity 85% or less
- Sensitivity drift +/- 2ppm / °C
- Includes AC adapter, manual and reference card

6L Mini-Water Bath

Compact design keeps samples warm and benchtop space maximized

- Temperature range ambient +5° to 100° C
- Stainless steel gable cover and seamless chamber.
- Pilot light indicates heating from 550W heating power.
- Exterior dimensions: 14"W x 11"D x 13"H (36 x 28 x 32 cm)
- Interior dimensions: 12.6"W x 6.7" D x 6.9" H (32 x 17 x 18 cm)

Item No.	Description	Pkg
DLS510	Water Bath, 6L, 120V	1/ea

Vikem® Vinyl-Coated Lead Rings

Stabilize labware in water baths without worrying about damage

- Vikem® Vinyl-Coated Lead Rings are available in a range of sizes to fit Erlenmeyer-style flasks and cylinders.
- The non-slip Vikem® surface seats securely around the neck of the flask to prevent floating and reduce breakage and spilling.
- The cushioned surface is chemically resistant and will not scratch glass labware.
- Sold in packs of 1.

Lead Rings

Item No.	Description	Outer Diameter	Inner Diameter	Fits
BRT183070003	Vinyl Coated, Lead, .36lb	2" (51mm)	0.74" (19mm)	5 to 10 mL cylinders
BRT183070005	Vinyl Coated, Lead, 0.5lb	3" (76mm)	1.7" (43mm)	125 to 500 mL flasks
BRT183070010	Vinyl Coated, Lead, 1lb	3.5" (89mm)	2.0" (51mm)	250 to 1000 mL flasks
BRT183070015	Vinyl Coated, Lead, 1.5lb	4" (102mm)	2.2" (56mm)	500 to 2000 mL flasks
BRT183070020	Vinyl Coated, Lead, 2lb	4.5" (114mm)	2.8" (71mm)	1 to 4L flasks

C-Shaped Lead Rings

Open rings are C-shaped to fit neatly around filtering flasks.

Item No.	Description	Outer Diameter	Inner Diameter	Fits
BRT183080500	Vinyl Coated, Lead, Open, .5lb	2.9" (74mm)	1.9" (48mm)	125-500 mL flasks
BRT183081000	Vinyl Coated, Lead, Open, 1lb	3.4" (86mm)	2.2" (56mm)	250-1000 mL flasks

BRT183084000	Vinyl Coated, Lead, Open, 2lb	4.5" (114mm)	3" (76mm)	1000-4000 mL flasks

Lead Ring Holder

Convenient storage of lead rings, fits rings with ID of 0.7" (17.8mm) or larger.

Item No.	Description
BRT183071000	Scienceware Flask Ring Holder

Kimax® Low-Form Griffin Beakers

Kimax beakers have uniform walls throughout and are made of KIMAX KG-33 glass

- Thick, slightly flared, beaded top, with a spout designed to have excellent pouring characteristics.
- All sizes have a durable matte finish marking area for use with an ordinary pencil.
- An easy-to-read white graduated scale is provided on all sizes from 20 to 4000 mL for measuring and/or mixing liquids where a high level of accuracy is not required.
- Designed from ASTM Specification E960, Type I requirements.
- CSF1408001 is ideal for start-up requirements and customers who need a variety of beaker sizes, but have limited lab space or glassware needs. The pack consists of five beakers (one each) in sizes of 50 mL, 100 mL, 250 mL, 600 mL and 1000 mL.

Item Number	Capacity	Graduations (mL)	Subdivisions (mL)	Approx OD (mm)	Approx Height (mm)	Inner Pack	Pkg

CSF140002000	2 L	200 to 2000	100	130	190	4/pk	8/cs
CSF1408001	Starter Pack - One each of 50 mL, 100 mL, 250 mL, 600 mL and 1L beakers.						

Tri-Corner Beakers

These tri-corner plastic beakers range from 50 mL to 1000 mL. They are unbreakable and can be used with commonly used acids, solvents and alkalis. They are autoclavable and reusable, yet inexpensive enough to be disposable. All six sizes are graduated in mL.

- Polypropylene (PP)
- Three dripless pouring spouts
- Molded graduation marks
- Heavy duty style

Item No.	Size	Pkg

DLS3634	800 mL	100/CS
DLS3635	1000 mL	100/CS

Polypropylene and Polymethylpentene Low-Form Griffin Beakers

Tapered pour spout facilitates liquid transfer without dripping

- Beakers are autoclavable at 121°C for 20 minutes and can withstand repeated autoclaving.
- Choose from printed or molded graduations and polypropylene (PP) or polymethylpentene (PMP) material.
- Translucent polypropylene withstands up to 135°C.
- Crystal clear polymethylpentene is shatter-resistant and withstands up to 180°C for short periods of time.

Micro-Hematocrit Glass Capillary Tubes

Our glass capillary tubes are designed for both safe blood collection as well as accurate micro-hematocrit determinations. Precision molded to provide excellent sample retention during centrifugation. Fill rapidly without affecting specimen integrity.

Technical Information

- **ID:** 1.15 mm +/- 0.05 mm
- **OD:** 1.5 mm +/- 0.05 mm
- **Length:** 75 mm +/- 1 mm
- **Volume:** 75 µL

Types of Tubes

- **Untreated:** Blue Tip
- **Sodium Heparinized:** Red Tip

Item #	Description	Pkg

BD Vacutainer® Blood Collection Set and Needle

Blood collection with safety in mind

- The BD Vacutainer® Safety-Lok® Blood Collection Set is simple, easy to use, and is safety engineered. The safety mechanism can be activated immediately after the blood draw and helps protect against needlestick injury. This set includes a 23g, 0.75" needle, light blue wings, 7" tubing and luer.
- The BD Vacutainer® Eclipse™ Blood Collection Needle offers a simple, effective way to collect blood and help reduce the possibility of accidental needlesticks with one-handed activation technique. The B-D368607Z is a 21g, 1.75" needle with a green shield.

Item #	Description	Pkg
B-D367292Z	BD Vacutainer® Safety-Lok® Blood Collection Set, 23g, 0.75"	50/bx
B-D368607Z	BD Vacutainer® Eclipse™ Needle, 21g, 1.25"	48/bx

Wide-Mouth LDPE Tamper-Evident Square Bottles (Rigid)

The square shape allows the bottles to be tightly and neatly packaged side by side. These bottles are ideal for transport and long-term storage. Confidential notes can be stored inside the bottle in the space between the plug and the screw cap.

Bottle = Low Density Polyethylene (LDPE)

Cap = Polypropylene (PP)

- Graduated
- Dual-cap feature; each bottle includes a screw cap and plug insert, providing a completely leak-resistant seal
- Tagging points for use with optional wire security ties
- Food grade

Item #	Description	Pkg
DLS600608	25 mL (0.8 oz)	100/cs

DLS600614	2000 mL (64 oz)	20/cs

DLS6006 Series

Wide-Mouth LDPE Tamper-Evident Round Bottles (Extra Flexible)

These economy laboratory bottles are extremely flexible and feature a wide-mouth opening for easy filling and emptying of liquids and powders. These bottles are ideal for transport and long-term storage. Confidential notes can be stored inside the bottle in the space between the plug and the screw cap.

Bottle = Low Density Polyethylene (LDPE)

Cap = Polypropylene (PP)

- Graduated
- Dual-cap feature; each bottle includes a screw cap and plug insert, providing a completely leak-resistant seal
- Tagging points for use with optional wire security ties

DLS6004 Series

Wide-Mouth LDPE Round Bottles

Exceptional leak-resistance for shipping

- The deep-threaded neck allows the screw cap to seal on tight for exceptional leak resistance.
- These LDPE bottles are flexible and feature a wide-mouth opening for easy filling and emptying.
- Bottles are graduated and approved for use with food products.

Bottle = Low Density Polyethylene (LDPE)

Cap = Polypropylene (PP)

Item #	Description	Pkg
DLS601608	50 mL (1.5 oz)	100/cs

Wide Mouth Round Bottles (Rigid)

These rupture-resistant bottles are extremely rigid and feature a wide-mouth opening for easy filling and emptying of liquids and powders. The deep threaded neck allows the screw cap to seal on tight, offering exceptional leak-resistance especially during shipping.

Bottle and Cap = Polypropylene (PP)

- Completely rigid and rupture-resistant
- Graduated
- Deep threaded neck for excellent leak-resistance
- Food grade
- Autoclavable at 121°C
- Do not autoclave with caps on

Item No.	Description	Pkg

Narrow-Neck Polypropylene Bottles

Rupture-resistant polypropylene (PP) bottles feature a narrow neck for easier emptying

- Tagging points on the bottle shoulder and cap can be secured using wire security tags to ensure a tamper-resistant closure.
- Molded graduation marks for volume determinations.
- Bottle and cap are both polypropylene(PP) material.
- Autoclavable at 121°C.

Narrow-Mouth Low-Density Polyethylene Bottles

A separate insert sealing plug provides additional leak resistance, making these bottles ideal for transport and long-term storage.

- Bottle made from Low-Density Polyethylene (LDPE) and easy-grip cap from polypropylene (PP).
- Graduated design with tagging points on the bottle and cap. Tagging points can be secured using wire security tags to ensure a tamper-resistant closure.

Qorpak® Boston Round Bottles

Made from high-grade borosilicate glass

- Bottles feature round body, rounded shoulders and narrow screw neck opening.
- Choose from clear for maximum visibility or amber for light-sensitive materials. Amber glass bottles protects contents from UV rays, absorbing nearly all radiation <450 nm.
- Bottles include green thermoset F217 and PTFE caps. Larger bulk pack options available. Contact your Medline representative for more information.

Item Number	Color	Size	Neck Finish	Dimensions	Pkg

QORGLC01504

Qorpak® Bottle Beakers

Medium round, clear, graduated bottles are ideal for use with biological and pathological specimens

- Mix, measure and store in the same container.
- Molded graduation in mL and ounces.
- Designed with a slight shoulder for easy pouring and handling.
- Bottles include green thermoset F217 and PTFE caps.
- Larger bulk pack options available. Contact your Medline representative for more information.

Item Number	Size	Neck Finish	Dimensions	Pkg
QORGLC01450	30 mL (1oz)	33-400	34mm OD x 68mm H	48/pk

Pre-Cleaned Containers for Product Integrity and Compliance

Whether you are looking for particle free packaging, or specific analyte removal with certification, Medline can provide the right pre-cleaned packaging for your application. Please feel free to contact your sales representative for further details.

Qorpak® Media Bottles

Manufactured from borosilicate 3.3 glass

- Bottles are autoclavable and withstand temperatures from -70 to 500°C.
- Bottle design has large permanent, white enamel graduations with white ID box, drip-free sealing ring and blue PP (GL45) sealing cap.
- **Starter pack includes ten media bottles:** two 100 mL, three 250 mL, three 500 mL and two 1L bottles

TriForest Polycarbonate Media Bottles

Lexan® polycarbonate (PC) is ideal for steam sterilization of all biologicals, liquids, reagents, media, buffers and aqueous solutions

- Bottles withstand repeated autoclaving, and are optimal for all microbial culture media production and preparation of terminally sterile fluids.
- Manufactured in a Class 10K cleanroom in an ISO 9001 compliant facility with virgin Lexan® polycarbonate resin that is durable, chemically inert, non-leaching, and clear.
- Bottles are provided non sterile with standard blue autoclavable caps engaged in a multibarrier elastomer packaging.

Four-Color Wide-Mouth Wash Bottles

4-Color, Right-to-Know, Safety-Labeled, Wide-Mouth Wash Bottles

- Wide 2" (50.8mm) opening makes for easy refilling.
- Choose from pre-printed bottles with the chemical name and formula, NFPA Section 704 four-color diamond, health hazards, CAS number and suggested PPE.
- Leak-proof, LDPE bottles with color-coded PP closures
- Translucent with the exception of sodium hypochlorite (white LDPE).
- **Assortment pack includes one each:** acetone, bleach, distilled water, ethanol, isopropanol, and label your own (LYOB).

Vented design prevents drips

Mini Centrifuge

Perfect for quick spin-downs of small samples

- The motor provides a super quiet, vibration-free operation and quickly accelerates to a maximum speed of 6,600 rpm (2,200 rcf) and stops within seconds.
- It comes standard with a six-place angle rotor for 1.5 mL to 2 mL microcentrifuge tubes, six tube adapters for 0.5 mL tubes and a separate rotor for sixteen 0.2 mL PCR tubes or two 8-tube PCR strips. Each rotor can be easily interchanged by the user in a matter of seconds.
- The crystal clear lid allows the operator to safely observe samples. A special safety shutoff system cuts the motor as soon as the lid is opened.
- 2,000 x g RCF with the round rotor and 2,200 x g RCF with the strip rotor.
- Footprint measures 5" x 5.4" x 3.9" and operates from 4 to 50°C. All items sold individually.

Item No.	Description
DLS545B	Mini-Centrifuge w/2 Rotors, Blue, 115V
DLS545B230	Mini-Centrifuge w/2 Rotors, Blue, 230V
DLS545R	Mini-Centrifuge w/2 Rotors, Red, 115V
DLS545R230	Mini-Centrifuge w/2 Rotors, Red, 230V
DLS545RND	Extra Round Rotor, 6x1.5 mL or 2 mL Tubes
DLS545ADP	Extra Tube Adapters, 0.5 mL Tubes
DLS545STP	Extra Strip Rotor

Polypropylene Carboys

Heavy-duty carboy has handles for carrying and is resistant to a wide range of chemicals.

- Carboys are available with or without spigot. Single-handed spigot allows for easy controlled dispensing.
- USP Class VI-certified, FDA-grade polypropylene carboy is autoclave-safe at 121°C (250°F).
- 83mm cap seals with a built-in thermo-plastic elastomer washer
- Two large handles for transport or pouring. Sold individually.

Eppendorf® 5418 and 5418R Centrifuges

These 18-place microcentrifuges are the ideal entry-level models for simple, daily applications

- Their speed of up to 16,873 x g allows for standard clinical and molecular biology applications.
- OptiBowl® concept for particularly quiet operation with separate Short Spin key for short centrifugation.
- Refrigerated model 5418R features a temperature range from 0 to 40°C and maintains 4°C at constant speed. ECO mode saves up to 47% of energy use.
- Condensation discharge prevents the accumulation of water in the chamber and reduces the risk of corrosion.
- Centrifuges include EPP564 rotor.

Eppendorf® 5424 and 5424R Centrifuges

24-place capacity and speed up to 21,130xg make these centrifuges a laboratory standard

- Ergonomically designed and perfectly equipped for all modern molecular biology applications.
- Choose between the rotary knob version for fast parameter selection or keypad version for easy cleaning.
- Refrigerated model 5424R features state-of-the-art cooling technology to cool down to 4°C in only 8 minutes, a temperature range from 0 to 40°C and maintains 4°C at constant speed.
- ECO shut off mode on model 5424R turns off cooling after 8 hours of non-use, saving energy and extending compressor life.
- Centrifuges include EPP566 rotor.

Eppendorf® 5804 and 5804R Centrifuges

Highly versatile for medium to high-throughput labs.

- High centrifugation speeds--up to 20,800 x g — for excellent separation.
- A variety of rotor and adapter selections to accommodate all your needs, including deepwell plates and swingbuckets. (If you need a version not listed, contact us for more information).
- Outstanding software control guarantees high time accuracy (± 2 s in 5 min), speed (1%) and temperature ($\pm 2^\circ\text{C}$ at 6°C)
- Refrigerated model 5804R features a temperature range from -9 to 40°C and maintains 4°C at constant speed.
- Centrifuges include EPP584 rotor with buckets for 0.2 to 100 mL tubes. (Purchase adapters separately for sizes other than 100 mL.)
- EPP584 rotor is ideal for cell culture, bacteria and blood samples with a speed up to 4,500 x g.
- EPP607 rotor with aerosol-tight lid works well for DNA, RNA and protein purification with a speed up to 16,640 x g.
- EPP582 rotor with aerosol-tight lid is for safe centrifugation of hazardous samples and purified biological samples with a speed up to 20,800 x g.
- EPP591 rotor works with plates up to 89mm loading height with a speed up to 2,250 x g. Rotor and buckets are autoclavable (20 minutes at 121°C).

Nitritex BioClean Ultimate™ Sterile Gloves

Excellent cytotoxic protection with exceptional grip

- Sterile, anti-static and compatible with ISO Class 4 cleanroom requirements
- Polychloroprene material, non-latex, powder-free and textured for improved grip
- Hand specific 12" length for coverage beyond the wrist
- Gamma irradiated and packed in 20 bags of 10 pairs (200 pairs per carton)

Item No.	Size	Pkg
NITBUPS6	6	200/cs
NITBUPS65	6.5	200/cs

Nitritex BioClean Fusion™ Sterile Gloves

Excellent grip, double-donnable & feels like latex

- Sterile, anti-static and compatible with ISO Class 4 cleanroom requirements
- Polychloroprene material, non-latex, powder-free and textured for excellent grip
- Ambidextrous 12" length for coverage beyond the wrist
- Beaded cuff enables easy donning and improved stability on the arm
- Easily double-donned, eliminating the need to stock different gloves in the cleanroom
- Gamma irradiated and packed in 20 bags of 10 pairs (200 pairs per carton)

Nitritex BioClean N-Plus™ Sterile Gloves

Elbow length nitrile gloves for extra protection

- Sterile, anti-static and compatible with ISO Class 4 cleanroom requirements
- Nitrile material, non-latex, powder-free and textured for improved grip
- Hand specific 16" length for coverage up to the elbow for extra protection
- Eliminate need for sleeve cover in most instances
- Gamma irradiated and packed in 20 bags of 10 pairs (200 pairs per carton)

Berkshire CHOICE® WIPERS

The CHOICE® Family of products is designed to provide the best value in higher levels of contamination control in critical processing applications

- Excellent for spill control in processing areas where absorbency is of the greatest importance
- Ideal for cleaning medical devices and related products
- Can be used for applying and removing cleaning and disinfecting solutions
- Print - used for stencil and other print roll cleaning applications
- Steam autoclavable for aseptic environments

Item No.	Description	Dimensions	Pkg
BKCHSS1212	CHOICE® SuperSorb Double Knit 2-ply, Sealed Edge, Laundered	12"x12" sheet (30x30cm)	75 sheets/pk, 12 pks/cs
BKCH80910	CHOICE® 800 100% Knit Polyester, Knife Cut	9"x9" sheet (23x23cm)	150 sheets/pk, 10 pks/cs
BKCH70914	CHOICE® 700 100% Knit Polyester, Sealed Edge	9"x9" sheet (23x23cm)	150 sheets/pk, 14 pks/cs

Berkshire MICROSEAL® WIPERS

MicroSeal® VP and MicroSeal SuperSorb® Lite are one of the highest absorbency polyester knit wipers available on the market

- Its unique design provides texture and extra durability when cleaning stubborn residues.
- It is an excellent wiper for applications where high concentrations of liquid are in use as well as cleaning and wiping rough surfaces.
- MicroSeal® wipers are 100% continuous filament knit polyester with ultrasonic sealed edges.
- Compatible with most cleaning and disinfecting solutions, both applying and removing.

Item No.	Description	Pkg
BKCSVP121214	MICROSEAL® VP, 12"x12" sheet (30cm x 30cm)	75 sheets/pk, 14 pks/cs
BKCMSVP09098	MICROSEAL® VP, 9"x9" sheet (23cm x 23cm)	150 sheets/pk, 8 pks/cs
BKCSLT121216	MICROSEAL SUPERSORB® LITE, 12"x12" sheet (30cm x 30cm)	50 sheets/pk, 16 pks/cs
BKCSLT090914	MICROSEAL SUPERSORB® LITE, 9"x9" sheet (23 x 23cm)	100 sheets/pk, 14 pks/cs

Berkshire DURX® WIPERS

General cleaning of contamination in controlled areas and equipment

- Excellent spill control and wet wiping
- Economic high volume cleaning and wipe-downs
- Designed specifically for applications in the preparation and controlled zones supporting critical and /or sterile production processes to reduce overall contamination and minimize costs.
- Nonwoven polyester/cellulose blend - Very absorbent with low fibers, no surfactants or binders
- Dry wipers are double bagged for room to room movement
- Sterile and Pre-wetted options are convenient to use.
- Safe - reduces handling of hazardous liquids
- Autoclavable

Item No.	Description	Dimensions	Pkg

Berkshire ECOCLEAN® 60 WIPERS

EcoClean® 60 can be used in critical pharmaceutical, medical device, and electronics applications where absorbency and softness are required

- Biodegradable & renewable - Made from 100% natural fiber that does not contain binders or additives
- Highly absorbent and durable - great as a work surface material or wipedowns
- Extremely soft - gentle on surfaces
- Heat resistant - perfect for hot surface wipedowns
- Resists build up of static charge

Item No.	Dimensions	Pkg
BKCECW601212	12"x12" sheet (30x30cm)	150 sheets/pack, 20 packs/cs
BKCECW6009152	9"x15" sheet (23x38cm)	250 sheets/roll, 2 rolls/cs

Waterproof Elbow Length Cryo-Gloves®

Protect yourself when working with cryogenic samples and solutions such as liquid nitrogen

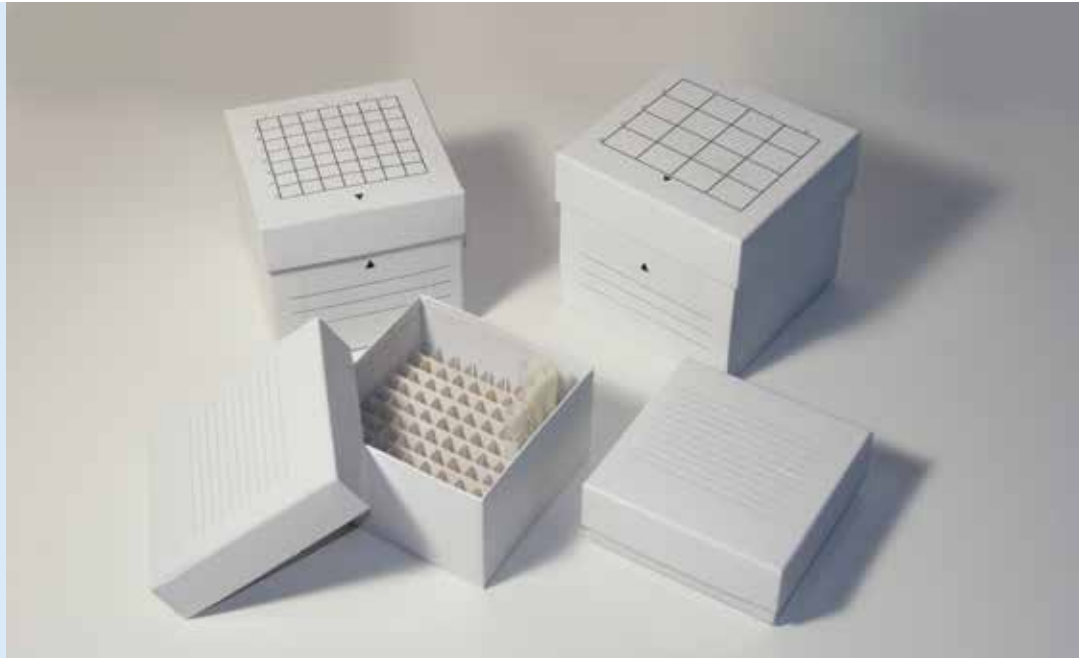

- Waterproof cryogenic gloves are designed to keep you dry and to wick moisture away from your hands for comfortable wear even during extended use.
- Multi-layered construction allows for a maximum level of thermal protection, flexibility, and dexterity.
- Approximately 17¼" to 19¼" (440-485mm) in length to keep the hand to elbow protected.
- **Caution:** Not intended for immersion in liquid nitrogen or other cryogenic liquids.

Cardboard Storage Boxes

Economical boxes for long-term storage of cryogenic vials

- Fit neatly into stainless steel freezer rack systems.
- Liquid-resistant outer coating keeps samples organized.
- Compatible with temperatures ranging from -196°C to +121°C.

BioBOX81 Tube Storage Boxes

These storage boxes are designed to withstand temperatures of -169°C to +121°C.

- Polycarbonate (PC)
- Temperature range: -169°C to +121°C
- Transparent lid for convenient viewing of contents
- The lid is printed with numbers for easy sample identification
- Lid has two angled corners to ensure the correct alignment of the numbers
- Autoclavable at +121°C, 15 psig (1 bar) for 20 minutes
- Fits in stainless steel storage racks
- A plastic tube picker is supplied with each storage box

DLS3042W

DLS3040B

Item No.	Description	Pkg
DLS3040B	81-place for 1 mL and 2 mL tubes, blue frame	5/cs
DLS3042W	81-place for 3-, 4- and 5-mL tubes, white frame	5/cs

Cryogenic Tubes

CryoClear™ tubes are designed for the cryogenic storage and transport of cells, blood, serum, and other biological fluids at temperatures as low as -196°C. Each tube has a unique printed barcode to eliminate the need for labels during storage and printed graduation marks for exact measurements. Available in both free-standing and round bottom designs.

Key Features

- CryoClear™ screw caps are co-molded with a thermoplastic elastomer layer and are 95kPa certified to provide a 100% leak-proof seal. This proprietary molding process eliminates the risk of contamination associated with brands that use separate silicone O-rings.
- Certified by an independent laboratory to be free of human DNA, DNase, RNase, Pryogen and ATP
- Manufactured, assembled and packaged in a Class 7 (Class 10,000) cleanroom in accordance with FDA, GMP and ISO Quality Guidelines (ISO 13485:2004, ISO 14644 and ISO 14698)

Material

- **Tube:** Medical polypropylene (PP)
- **Cap:** Medical polyethylene (PE) co-molded with a thermoplastic elastomer (TPE) layer

Technical

- **Sterility:** Beta radiation
- **Autoclavable:** recommended at +121°C, 15 psig (1 bar) for 20 minutes
- **Temperature range:** -196°C to +121°C
- For use in the gas phase of liquid nitrogen
- **WARNING:** Do not use CryoClear tubes in the liquid phase of liquid nitrogen.

Kimax® Graduated TD Cylinders

KIMAX cylinders are calibrated to deliver

- Scale is durable white ceramic enamel.
- SAFE-GARD bumpers are supplied with sizes 25 through 2000 mL.
- The 10 mL size has an enlarged funnel-shaped top for ease of filling.
- The 10 and 25 mL sizes are comparatively short to provide increased stability.
- Designed from ASTM Specification E1272, Style 1, Class B requirements.
- CSF2002401 is a starter pack consisting of 5 cylinders (one each) in sizes of 10, 25, 50, 100 and 250 mL. Ideal for start-up requirements and customers who need a variety of cylinders, but have limited lab space or glassware needs.

Item Number	Capacity	Graduated Interval (mL)	Subdivision (mL)	Tolerance (mL)	Approx. Ht (mm)	Bumper Size	Inner Pack	Pkg

CSF2002401	Starter Pack - Contains one each of 10, 25, 50, 100 and 250 mL graduated cylinders							

Plastic Graduated Cylinders

Ideal for the safe and accurate measurement of all types of liquids

The non-wetting interior surface eliminates concave menisci, providing more accurate measurements. The wide pentagonal shaped base makes the cylinder stable and roll-resistant. The heavy-duty plastic withstands repeated autoclaving.

- Choose from translucent Polypropylene (PP) or crystal clear Polymethylpentene (PMP)
- Available with either molded graduations or easy-to-read blue printed graduations
- Wide opening and tapered pour spout
- Graduated in milliliters (mL)
- Chemically resistant to most acids, bases and many common solvents
- Autoclavable at 121°C for 20 minutes
- Food grade

Vacuum Desiccators

Small footprint, top performance - desiccators hold a full vacuum at room temperature for 24 hours and will remain airtight even if not under vacuum

Jar-type desiccators feature a polypropylene stopcock with PTFE plug that accepts 0.25" ID tubing. Vivid red handle controls airflow and provides a quick visual cue for open/closed orientation. Flat top domes maximize interior space. Neoprene O-ring seals tightly down to 0°C. All models include a 1/8" thick perforated plate.

Clear Polycarbonate Tops and Bottoms for All-Angle Viewing

Secador® Techni-Dome 360

The Secador® Techni-Dome 360 vacuum desiccator is the largest in its class. It is ideal for contamination-free, dust-free desiccation, storage and degassing. For example, it is effective for drying, cooling and degassing humidity-sensitive salt cells used in IR spectrometers, thin-layer chromatography plates, and sensitive electronics.

- 65 liters (4000 cu. in.) volume
- Space for multiple trays, racks, plates and instruments
- Holds items up to 45cm (18") tall or wide
- Two detachable polypropylene shelves, 365mm (14.37") and 225mm (8.85") in diameter
- Top and bottom can be locked together with tamper-evident seals or locks
- Weighs roughly 5 kg (11 lbs) and can be transported by molded-in handles
- Safety locator pins in the top and bottom halves prevent the halves from displacing when one side is lifted

BRT420290000

Desiccant

Variety of sizes and types to support proper humidity conditions

- BRT42045-series have a disc shape which are easy-to handle with Natrasorb® T1 indicating silica gel beads. Beads change to pink when moist and are contained in a durable, polyester felt bag with a perforated Mylar® cover.
- BRT420460000 Desi Can® is a reusable desiccant canister. Silica gel effectively absorbs moisture through perforations in the aluminum case. One canister maintains humidity in 3 cubic feet of space. Monitor window changes to pink when saturated.
- BRT42048-series are clear PS dishes which allows instant visual inspection of silica gel, which changes to pink when saturated. Each cartridge is individually sealed and sold in packs of 6.

Secador® Gas-Ported Desiccator Cabinets

Wide range of sizes for those who require controlled, gas-purged desiccation

All models include gas ports for ¼" ID tubing; patented door seal design; tab latches and security loops for padlocks or tamper-evident seals; perforated shelves to facilitate air circulation; and closeable valves to use desiccator cabinets with standard desiccants.

Secador 1.0 to 4.0 cabinets are made of Durastar® co-polyester which blocks 99% of UV light and is resistant to staining, crazing and chemical attack. Amber color units also block over 50% of visible light.

Autodesiccators include a door-mounted dial hygrometer. Preset electronically controlled desiccant regeneration eliminates the need to monitor desiccant. Relative humidity reduction to roughly 25% is accomplished in about 8 hrs.

- **Mini desiccator is made of clear PS for easy viewing.**
Dimensions: door opening: 9.3"W x 5"H (23.6 W x 12.7 H cm) Overall dimensions: 13.3"W x 10"D X 8.5"H (33.8W x 25.4D x 21.6H cm) Internal volume: 0.35 cu. ft.
- **Model 1.0** has one fixed shelf, an internal volume of 0.74 cu ft and height of 8.4" (21.3 cm).
- **Model 2.0** has two adjustable shelves, an internal volume of 1.16 cu ft and height of 12.4" (31.4 cm).
- **Model 3.0** has three adjustable shelves, an internal volume of 1.55 cu ft and height of 16.4" (41.7 cm).
- **Model 4.0** has three adjustable shelves, an internal volume of 1.87 cu ft and height of 20.4" (51.8 cm).

Simport Sterile Polystyrene Petri Dishes

Economical, optically clear dishes are precision-molded from biomedical grade polystyrene so cultures are clearly visible without distortion. Dishes are packaged in heavy-wall polyethylene sleeves and 500/cs.

Item No.	Description	Features
SMPD2107	100 x 20 mm	For unimpaired observation of specimen growth with raised straight ridge around top for stable stacking.
SMPD2107WL	100 x 20 mm, Venting Ribs	Three venting ribs into the underside of the lid to prevent condensation build-up.
SMPD2108	100 x 20 mm, Deeper Fill, Venting	Used for fungal cultures, plant propagation. This dish has three venting ribs into the underside of the lid to prevent condensation build-up.
SMPD2108R	100 x 20 mm, Deeper Fill, Non-Venting	Used for fungal cultures, plant propagation. Non-vented lid has a raised straight ridge around top for stable stacking.
SMPD21013	60 x 15 mm, Venting Ribs	For small culture quantities and unimpaired observation of specimen growth. Three venting ribs prevent condensation, and raised straight ridge around the top for stacking.
SMPD21014	50 x 9 mm	Box-type dish for culturing of mycobacteria, aerosol testing, membrane filter and immunodiffusion techniques. Tight lid prevents sample dehydration.
SMPD21015	35 x 10 mm, Venting Ribs	For small culture quantities and unimpaired observation of specimen growth. Three venting ribs prevent condensation, and raised straight ridge around the top for stacking.
SMPD21016	100 x 100 x 15 mm with Grid	For phage typing, susceptibility testing, plate counts, and probe assays. Each 13 mm grid is marked numerically in one direction and alphabetically in the other. This dish has four venting ribs into the underside of the lid to prevent condensation build-up.
SMPD21017	10 x 10 mm Gridded, Contact Plate	Numbered and lettered squares to facilitate counting and to locate colonies. The SMPD21017D is designed with a convex bottom in order to save on culture medium.
SMPD21017D	10 x 10 mm Gridded, Contact Plate, Convex Bottom	
SMPD21018A	50 x 9 mm Rimmed without Pad	Accommodates 47 mm diameter membrane filters. These dishes are stackable and have squared off edges on both the top and bottom which provide convenient grips for one handed opening. The snug fitting top ensures that neither the absorbent pad nor the agar media will dry out during incubation. A frosted area on top of lid permits labeling. SMPD21018B has absorbent pads that are ideal for culturing micro-organisms on either agar or broth based media.
SMPD21018B	50 x 9 mm Rimmed with Pad	

Note: SMPD2107 through SMPD21015 are not recommended for tissue culture applications.

Polystyrene, Anti-Static Pour Boats

These safe, contaminant-free, biologically inert, economical containers are specially made to facilitate dispensing of powdered and liquid materials. The molded material is thicker than conventional weighing dishes. Non-reactive with most substances and suitable for weighing static affected materials. Will withstand temperatures up to 80°C.

Item No.	Description	Pkg
DLS3620	Small, 20 mL, 41 x 41 x 8 mm	250/cs

Hexagonal Polystyrene Anti-Static Weighing Dishes

Produced from a special grade of polystyrene to resist diluted acids, aqueous solutions, alcohols and bases. Can withstand temperatures up to 80°C. Non-reactive with most substances and suitable for weighing static affected samples. The molded hexagonal design provides greater balance, protection and safety. Excellent for handling solids or liquids during weighing. They can easily be bent into pouring spouts to provide accurate transfers with minimal sample loss.

Wypall® Wipers

Wypall Wipers come in a variety of sizes and features for the task at hand.

- L30 Wipers are ideal for light duty cleanup, easily removing liquids.
- L40 Wipers are value-priced, general purpose wipers featuring DRC technology for absorbing liquids and oils, yet extremely cloth-like.
- X60 Wipers are the standard, general-purpose wipers. These wipers bring the absorbing power of HYDROKNIT* technology to a lighter weight wiper. Reinforced for extra scrubbing and cleaning power.
- X70 Wipers are reusable, general-purpose wipers that also feature the HYDROKNIT technology and stay stronger longer.
- X80 Wipers are the toughest wipers and feature the HYDROKNIT technology. The ideal choice for the toughest jobs, and will leave no residue.

Medline Detergents

*A variety of detergents - optimized for different contaminants
- to make short work of dirty labware*

Medline Enzymatic Detergents

Ideal for cleaning without the need for a presoak and can be used for manual cleaning, in automatic washers and with ultrasonic machines. The Single-Enzymatic formula removes protein. The Dual-Enzymatic detergent is highly effective at disintegrating protein deposits, starch and carbohydrates.

Item No.	Description	Pkg
MDS88000B9	Dual Enzymatic Detergent, 1 gal bottle	4/cs
MDS88000B91	Single Enzymatic Detergent, 1 gal bottle	4/cs

Medline Alka-Wash

A low-suds, moderate pH detergent. Alka-Wash can be used for manual cleaning, in automatic washers and with ultrasonic machines, effectively removing blood and tissue from surgical instruments, dissection supplies, glassware and plasticware.

Item No.	Description	Pkg
MDS88000AW1	Alka Wash Detergent, 1 gal bottle	4/cs

Foam PreSoak Spray

The spray rapidly digests proteins and fats and provides cleaning action for up to 12 hours. As it is a precleaner, rinse or flush item prior to further cleaning.

Item No.	Description	Pkg
MDS8800FOAM	Foam PreSoak Spray, 24 Oz Spray	15/cs

Meritz® Plus Disinfectant/Decontaminant

One step cleaner, disinfectant and deodorizer

- A general disinfectant for equipment or immersion soak of surgical/dissection instruments prior to further cleaning.
- Bactericidal, fungicidal, virucidal (including HIV-1) and tuberculocidal.
- No mixing, measuring or rinsing needed.

Item No.	Description	Pkg
MDS8840032	Meritz Germicidal Spray, 32 Oz	12/cs

Bel-Art Labmat™ Bench Liner Sheets

Labmat™ Bench Liner speeds clean-up and safeguards work surfaces from stains, spills and wear.

- The highly absorbent upper surface traps up to 420 mL/m² of water, dyes, corrosive chemicals or radioactive solutions.
- Flexible polyethylene film backing is non-skid and prevents soak-through of most solutions.
- Simply roll up and discard after contamination.
- Safety Orange for biohazard designated use.
- Available in cut-sheets with standard use or roll for the safety orange Labmat.

BRT246750000	Labmat Liner, 20" x 50' (50.8cm x 15.2m)	1 roll
BRT246751000	Labmat Liner, Orange, Biohazard, 20" x 50' (50.8cm x 15.2m)	1 roll

Absorbent Laboratory Countertop Paper

Air laid with a poly back for absorbance without leak-through

Item No.	Description	Pkg
NON01220P	12" x 20" Sheets	600/cs
NON01820	18" x 20" Sheets	400/cs

Utility Scissors

Size paper and film easily with these scissors

- Guide at tip lifts paper from surface for easier cutting.

Item No.	Description	Pkg
MDS10750	Plastic-Handle, 7.5"	12/bx
MDS10750H	Plastic-Handle, 7.5"	1/ea

Kimax® Narrow-Mouth Erlenmeyer Flasks

KIMAX Flask rims are reinforced and tooled with a rounded finish, containing more glass to give them maximum mechanical strength

- Body is thick walled with a long tapered outside contour to minimize chipping.
- Durable white ceramic enamel scales to indicate approximate volumes at various levels, useful in measuring and mixing solutions where a high degree of accuracy is not necessary.
- Designed from ASTM Specification E1404, Type I, Class 1 requirements.
- CSF265201 is ideal for start-up requirements and customers who need a variety of Erlenmeyer's but have limited lab space and glassware needs. This starter pack consists of five flasks one each of the following sizes: 50, 125, 250, 500 and 1000 mL.

Item No.	Capacity (mL)	Graduations (mL)	Subdivisions (mL)	Rubber Stopper Size	Approx. Width (mm)	Approx Height (mm)	Inner Pack	Pkg

CSF265201	Starter Pack - Contains one each of 50, 125, 250, 500 and 1000 mL flasks							

Flat Base

Baffled Base

TriForest Polycarbonate Erlenmeyer Shaker Flasks

Optically clear, the flasks are certified pyrogen free and DNase-/RNase- free

- Disposable or reusable - manufactured with virgin, optically clear, non leaching LEXAN®; resin that retains clarity after gamma radiation.
- Ideal for cell cultures, microbial cultures, plants, media preparation and storage.
- Patented DuoCAP® allows sterile air exchange or a leak-proof seal, allowing for the same vessel to be used for aerobic/anaerobic culture.
- Flasks are re-autoclavable, reusable, individually packed in EZ-Tear bags, and sterile to SAL 10⁻⁶.
- Available with a flat or a baffled base. Choose baffled base flasks when increased levels of oxygenation add mixing are required.

Disposable Funnels

These economical, disposable funnels are available in either transparent polystyrene or translucent polypropylene. They are lightweight, have reinforced rims and inside fluting. They are tapered at a 60° angle.

- Polypropylene funnels tolerate most strong acids, alkalis and organic solvents
- Polypropylene funnels are autoclavable; heat resistant up to 121°C
- Polystyrene funnels are suitable for aqueous solutions, weak acids and alkalis
- Packaging: 25/sleeve, 4 sleeves/box
- Stem opening 4.3 mm

Medline Professional™ Nitrile Exam Gloves with Aloe

Thick glove that soothes the hands

- Contains an inner coating of freeze dried aloe vera.
- Exceptional protection against harsh chemicals.
- All-over texturing for better grip on small or large items, wet or dry.
- Available in standard 9" with 5.9 mil fingertip and 5.5 mil palm thicknesses or extended 12" cuff length with 7.5 fingertip and 6.7 mil palm thicknesses.

Item No.	Size	Cuff Length	Pkg
PRO31760	X-Small	9"	100/box, 10 boxes/cs
PRO31761	Small	9"	100/box, 10 boxes/cs

PRO31754	X-Large	100/box, 10 boxes/cs

Medline Professional™ Latex Exam Gloves

Provides exceptional tactile sensitivity

- Unmatched elasticity and sensitivity from latex.
- Low-protein-level latex helps reduce latex sensitivity to wearers.
- Textured all over for better grip on glassware and cold samples.
- 6.7 mil fingertip and 6.3 mil palm thicknesses.

Item No.	Size	Pkg
PRO31790	X-Small	100/box, 10 boxes/cs

Wire Glove Box Holders

These glove box holders are a great organizational tool

- Free up space on benches or counters.
- White coated wire glove box holders come in single, double, triple, and quadruple glove box quantities.
- Wire holders allow for easy viewing of sizes of gloves.
- Wire holders are made of durable materials to last for years.

Triumph® Surgical Gloves

Instead of potentially harmful powder as a donning agent, Triumph Surgical Gloves utilize a synthetic polymer coating for effortless dry/damp donning

- Triumph surgical gloves are sterile, made from latex, powder-free and feature a smooth surface, 9.4 mil thickness and white color.
- Ideal for general surgery.

Item No.	Size	Pkg
MSG2255	5.5	200 pr/cs, 50 pr/bx, 4 bx/cs
MSG2260	6.0	200 pr/cs, 50 pr/bx, 4 bx/cs

Signature Glide® Surgical Gloves

Glide finish exterior provides exceptional control and tactile sensitivity

- Signature Glide surgical gloves are sterile, made from latex, powder-free and offer a smooth surface with 10.2 mil thickness.
- Reinforced cuff to help reduce cuff-roll down and tearing.
- Anatomical former design replicates the natural hand shape to reduce hand fatigue.
- Translucent color provides contrast when double gloving.

Item No.	Size	Pkg

Triumph® Ortho with Aloe Surgical Gloves

Thick and durable for enhanced protection

- Triumph Ortho with Aloe surgical gloves are sterile, made from latex, powder-free, lightly textured and brown with 13 mil thickness.
- Aloetouch technology moisturizes skin during use.
- Ideal for use during procedures where sharp bone fragments may be present or rugged, durable surgical instruments are in use.

Item No.	Size	Pkg
MSG2660	6.0	200 pr/cs, 50 pr/bx, 4 bx/cs

MSG1690	9.0	200 pr/cs, 50 pr/bx, 4 bx/cs

SensiCare® with Aloe Surgical Gloves

SensiCare revolutionized the medical glove industry as the first synthetic Polyisoprene surgical glove

- Offers the fit, feel, comfort and performance of traditional latex gloves without the harmful latex proteins.
- Sterile, latex-free (Polyisoprene), powder-free, smooth, 9.8 mil thick and white.
- technology moisturizes skin during use.
- Ideal for general surgery.

Item No.	Size	Pkg
MSG1055	5.5	100 pr/cs, 25 pr/bx, 4 bx/cs

Neolon® 2G Surgical Gloves

The new polychloroprene formulation is softer, more elastic and comfortable than traditional polychloroprene gloves

- Neolon 2G surgical gloves are sterile, latex-free (Polychloroprene), powder-free, brown and lightly textured with 9.1 mil thickness.
- ARC (anti-roll cuff) is designed to reduce cuff roll-down that is common with most powder-free gloves.
- The inner polymer coating allows for easy donning both with damp and dry hands.
- Brown/tan color reduces glare during procedures.
- Ideal for general surgery and users with skin sensitivities.

Item No.	Size	Pkg

Tradition™ Surgical Gloves

Tradition™ powdered latex gloves are an ideal combination of tactile sensitivity, comfort and durability

- Tradition surgical gloves are sterile, powdered latex and feature a smooth surface, 8.7 mil thickness and white color.
- Their anatomical shape makes them fit better, especially for in-between sizes.
- Curved fingers reduce hand fatigue while the beaded cuffs prevent roll-back and make gloves easy to put on.
- Ideal for general surgery.

SMP4763	For use with large capsules, 34.55 mm x 2 mm	1000/pk 10,000/cs

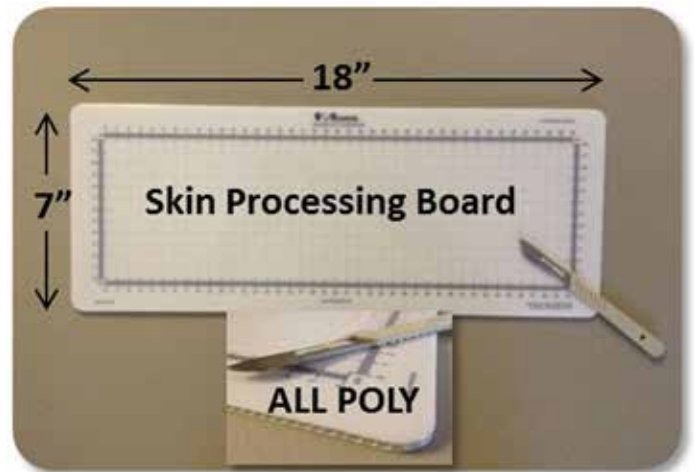

Disposable Laboratory Cutting Boards

Single-use, disposable cutting surfaces prevent cross-contamination

- Choose from all poly construction or durable poly-coated SBS paperboard.
- All-poly construction boards are ideal for skin processing and can be sterilized via gamma or with ETO. During procedures, acrylic film cutting surface provides excellent tissue-to-surface friction for tissue stability and the bottoms are coated with slide-resistant film to keep boards in place during use. Metric measurements on the surface allow for easy sample sizing and segmentations.
- Polyethylene-coated paperboard construction is easier on expensive scalpel blades. Paperboard sides may be folded up to contain fluids. Paperboard units have metric perimeter rulers and metric sizing circles.

Simport Histology Cassettes

Choose from a variety of styles depending on your protocol

- Cassettes are made of acetal and designed to hold specimens in place during processing, embedding and storage. Colors are non-cytotoxic and non-metallic.
- Anterior 45° writing area makes cassettes more suitable for use with certain cassette labeling instruments.
- **Histosette® I series** feature a one-piece integral lid that can snap apart and be conveniently locked into the base of the cassette.
- **Histosette® II series** are designed for single-handed operation. The SMPM485- and SMPM486-series are most convenient for cassette labeling instruments since covers are already removed from cassettes and are packaged separately in the case.
- **Unisette™** cassettes allow for one-handed operation and feature a snap-latch and hinge-lock design. This design can be opened and closed as often as necessary and always relock securely.
- **Micromesh™** cassettes require no biopsy pads for use. The 1676 square openings allow for greatly improved fluid exchange. The cover does not protrude above the cassette, allowing more cassettes to be stacked into automated machines.
- **Swingsette™** cassettes have a special hinge that holds the base and cover together. This hinge allows cassettes to be opened and closed as often as necessary. The cover can be removed and re-inserted easily without danger of specimen loss.
- Back-mounted locking devices prevent cassettes from opening during processing.
- Designs for tissue processing feature efficient flow-through slots to maximize fluid exchange and ensure proper drainage
- Other colors available. Contact us for more information.

Simport QuickLoad™ Sleeved Embedding Cassettes

These sleeved cassettes are especially made to be used with ThermoFisher printers.

- Molded from a special high density acetal polymer, they keep specimens safely submerged and are totally resistant to the chemical action of solvents used in histology laboratories.
- The efficient flow-through slots maximize fluid exchange and ensure proper reagent drainage.
- For QuickLoad Cassettes for other printer brands, contact us for details.

Hot Plate/Stirrer

Space-efficient design (8" x 9" footprint) makes it ideal for use on crowded benchtops and inside of hoods.

Other physical attributes include: a durable, chemical resistant white ceramic work surface; 7.5" x 7.5" work surface to accommodate a wide variety of glass beakers, flasks and bottles; and the included support rod for mounting thermometers and temperature probes.

An advanced microprocessor and convenient turn knobs allow quick, precise adjustment and maintenance of speed and temperature. Safety indicator LED's on the front panel indicate when the heating and/or stirring functions have been activated.

Quick adjustment knobs make it easy to set the speed range (60 - 1500 rpm) and the temperature range (65°C to 380°C).

Platform dimensions: 7.5" x 7.5" (19cm x 19cm)

Inoculation Loop – Rigid Feel

These disposable inoculation loops and needles offer the most convenient and safest way of streaking culture media. Molded from a special medical grade of polystyrene, they offer a strong, rigid feel to provide comfortable, stable and uniform streaking.

- Certificate of calibration available
- Gamma sterilized

Item #	Description	Units
DLS2851	1µL with needle, blue, sterile	individually wrapped 500/cs
DLS2861	1µL with needle, blue, sterile	10/peel pack (50 packs/cs) 500/cs
DLS2811	1µL with needle, blue, sterile	20/peel pack (25 packs/cs) 500/cs
DLS2855	10µL with needle, yellow, sterile	individually wrapped 500/cs
DLS2865	10µL with needle, yellow, sterile	10/peel pack (50 packs/cs) 500/cs
DLS2815	10µL with needle, yellow, sterile	20/peel pack (25 packs/cs) 500/cs
DLS2850	10µL & 1µL, white, sterile	individually wrapped 500/cs
DLS2860	10µL & 1µL, white, sterile	10/peel pack (50 packs/cs) 500/cs
DLS2810	10µL & 1µL, white, sterile	20/peel pack (25 packs/cs) 500/cs

Inoculation Loop – Flexible Feel

Produced from medical grade polystyrene. Both the loop and needle ends are designed to be more bendable than our “rigid” loops. They are smooth and flexible to facilitate uniform streaking of culture media. ETO sterilized and packed 20 loops per peel-pack.

Item #	Description	Units
DLS2801	1µL with needle, natural, sterile	20/peel pack (50 packs/cs) 1000/cs
DLS2805	10µL with needle, blue, sterile	20/peel pack (50 packs/cs) 1000/cs

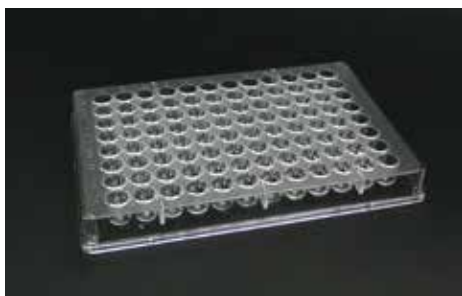

Spreaders and Needle

- Spread solutions or transfer bacteria without flaming with these disposable spreaders and needles
- Spreaders and needles come sterile and are made from polystyrene. Just use and discard.

Item No.	Description	Pkg
DLS2910	L-shaped Spreader, Individually Wrapped	100/cs
DLS2911	T-shaped Spreader, Individually Wrapped	100/cs
DLS2813	Needle with Spreading Sphere, Packaged 20 in a Peel Pack	1000/cs

DLS120038

96-Well Microwell Plates

Untreated for use in microbiology, serology and micro chemical reactions.

- Made from high-optic, transmission-grade polystyrene, the plates and lids (sold separately) are individually wrapped and available sterile or non-sterile.
- Plates are arranged in the standard 12 x 8 configuration with alphanumeric position markings.
- Select from u-bottom (round), v-bottom (conical) or flat bottom to match the well type needed for your work.
- Well volume is 300µL for u-bottom, 250µL for v-bottom and 375µL for flat bottom.
- Lids are sold separately.

SMPT1105

Simport BioBlock™ Deep-Well Plates

Specially-designed, non-sterile plates for a variety of applications including high-throughput screening, combinatorial chemistry, sequencing and cultures

- Plates conform to SBS standard footprint and are compatible with all leading robotic sample processors, automated liquid handling systems and 8-/12-channel pipettors.
- Made from polypropylene, these plates withstand temperatures of -196°C to 121°C and are DMSO resistant.
- Physical attributes include an alphanumeric grid for sample identification, corner plate cut-away to facilitate orientation and stackable design.
- When used with microtiter plate rotors, the plates can withstand centrifugation up to 6000xg.
- Plates are packaged in packs of 4 and sold as 6 packs/case.

Microscope Slides

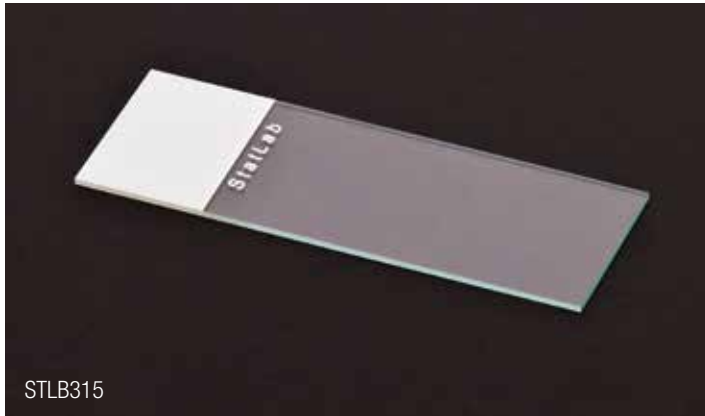

With the wide variety, there is a slide to meet your application

Different corners and edges provide different benefits.

- The 90° corner is perfect for automatic cover slip machines. The safety and clipped corners prevent finger and hand cuts. The beveled edge is angled at 45° for smearing processes.
- Charged slides are frosted on one end, one side and offer the ideal surface for cell and tissue adhesion.
- Produced from premium glass sheets, with the exception of the charged slides which are produced from the finest quality white glass.
- Slides measure 25x75x1mm with a thickness of 1-1.2mm and arrive pre-cleaned and ready to use.
- Packaged in a box of 72 and sold in cases of 20 boxes.

STLB315

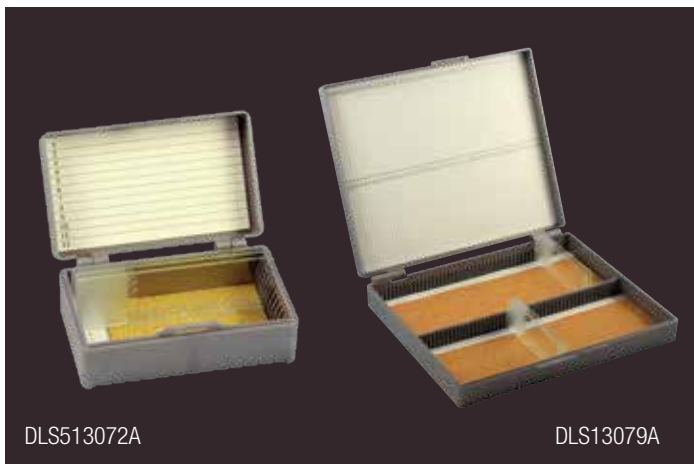

STLB418

Premium Frosted Microscope Slides

Premium Microscope slides for precise results

- Microscope slides are made from the highest grade materials, such as 3/4 white soda-lime material.
- Glass is pre-cleaned and free from film and distortion.
- Choose from premium, Histobond® or Unimark® slide varieties. Each one is marked to indicate any treatment.
- HistoBond slides are silane treated so that tissue sections and cytologic preparations adhere better to slide. UniMark slides are excellent for both automated labelers or manual slide labeling.
- Slides are packed 144 to a pack and sold in a case of 10 packs.

Slide Storage Box

Designed for the safe, long-term storage of microscope slides

They are produced from durable ABS plastic and offer a hinged lid for easy opening and closing. An inventory sheet is located on the inside for convenient slide identification and organization. The base of the box is cork lined for added protection. Available in four sizes, these storage boxes accommodate 25 x 75 mm and 1" x 3" microscope slides. The inside flaps are recessed so that there is no contact or contamination between the slides and the cover when closed.

Item #	Capacity	Units

Cover Glasses

Packaged to prevent sticking

- Choose STLB10222-series for premium German cover glasses, specially designed and manufactured to work with the automated cover-slip machines.
- The DLS14-series of cover glasses are packed with desiccant.
- All versions are packed in 1-oz (by glass weight) flip-top boxes and sold in a case of 10 boxes.

Available in three thicknesses:

- **No. 1:** 0.14 mm +/- 0.015 mm
- **No. 1.5:** 0.175 mm +/- 0.015 mm

Eppendorf® Repeater Plus and Combitips Advanced™ Tips

This system provides high-precision, contamination-free, repeated volume dispensing, regardless of liquid viscosity or density

The Eppendorf Repeater Plus is a mechanical hand-held dispenser which is ideal for saving time and speeding up long pipetting series. The responsive handling tackles high numbers of samples or whenever high precision dispensing of viscous, volatile or foaming liquids is requested.

Ergonomic design considerations include a volume selection dial for easy volume setting from 1 µL–10 mL, with dispensing volume clearly displayed on the LCD, a dispenser lever with smooth handling to minimize hand fatigue while allowing the user to move ≤ 100 steps without stopping and ejection key for touchless tip release.

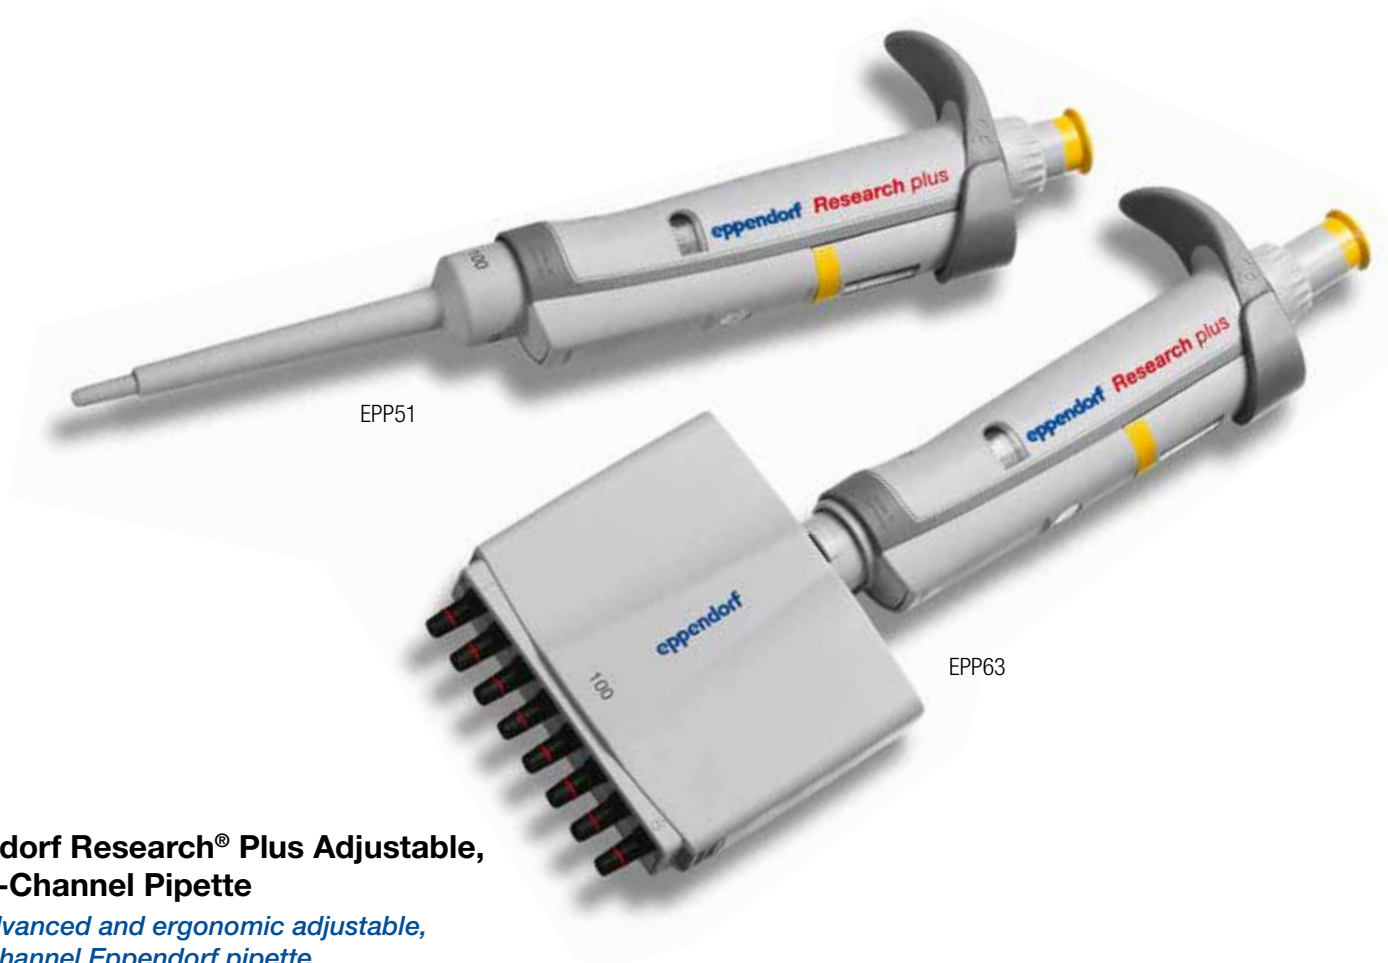

The Combitips Advanced tips are automatically recognized by the Eppendorf Repeater and color-coded for visual volume recognition. The tips are designed to prevent aerosol contamination with a hermetically-sealed piston for secure dispensing and provides protection from radioactive and toxic substances. Elongated tips (for 2.5 mL, 5 mL and 10 mL) allow complete emptying of all common tubes and prevents sample loss.

Combitips are packaged in quantities of 100 and available in three purity grades for each application:

- Eppendorf Quality, Sterile or Eppendorf Biopur®
- Eppendorf Quality: Portioning in 4 bags (25 pcs. each) ensures dust-free storage.
- Sterile and Biopur Quality: Individually wrapped (Biopur supports clean room conditions).

Volume	Min/Max Volume	Increments	Item No.		
			Eppendorf Quality	Sterile	Biopur

EPP51

EPP63

Eppendorf Research® Plus Adjustable, Single-Channel Pipette

Most advanced and ergonomic adjustable, single-channel Eppendorf pipette

- Only a few turns to reach your desired volume.
- The control button requires a very low operating force with color indicator for pipette volume.
- 4-digit volume display with magnifying shape for easier viewing.
- Accommodates liquids with viscosities very different than water through the secondary adjustment display and opening.
- Fully autoclavable with the lower part removable in two steps.

Item No.	Description	Pkg

Eppendorf ep T.I.P.S. Pipette Tips

Get the maximum benefit from your pipettor with Eppendorf ep T.I.P.S.

- The Eppendorf Totally Integrated Pipetting System (ep T.I.P.S.) works in perfect combination with the Eppendorf pipettes, resulting in reduced-force tip attachment and ejection with complete sealing.
- The universal nose cone design allows the tips to be used with pipettes from other manufacturers, allowing you to take full advantage of the ep T.I.P.S. features.
- The tips are manufactured to maintain ideal wetting properties and boast high transparency and certified purity levels.
- Every tip is manufactured to match specifically to its respective Eppendorf pipette(s), thus ensuring the maximum precision and reliability you have come to expect and rely on.
- All components are 100% recyclable.
- There is also reduced waste as compared with disposable racks: The refill system, depending on tip size, is packaged as either dual-sided or in stack form and reloads are available in two purity levels: Eppendorf Quality and PCR clean.

Reference Pipette Tips (Graduated)

These graduated pipette tips are engineered for use on a wide variety of pipettors. They feature a universal grip design, made of flexible materials with a series of bands and supports that produce a positive seal. All reference tips are provided with calibration lines at specific volumes, acting as visual checks to minimize any risk of errors during sample aspiration. All tips are fully autoclavable (121°C/15 minutes)

1–200µL; 50 mm

UniPlast™ plastic serological pipettes

Manufactured as a single piece, eliminating loss volume

Unlike other brands that weld the separate tip and mouth pieces to the main body, our one-piece seamless design provides faster fill and release rates, ensures a complete flow out of the sample and offers a higher degree of accuracy. Printed black graduation marks prevent ambiguity and guarantee full volume.

Features

- Calibration is certified for accuracy
- Aerosol barrier filter plug prevents both liquid and aerosols from contaminating the pipettor
- Ergonomic design for use in tight spaces
- Reverse graduations
- Negative graduations (not on 25 mL sizes)
- Color-coded using ASTM 2380 industry standards
- Calibrated to deliver (TD), meets ASTM E934

Technical Specifications

- **Material:** Polystyrene (PS)
- **Plug:** Bonded polyolefin fiber
- **Inaccuracy:** <2 percent at full volume
- Pyrogen-free, non-hemolytic (ISO 10993-5) and LAL tested (0.5µ/mL)
- **Sterility:** Sterilized by gamma irradiation, RNase-free and DNase-free

Pipette Pump™ Pipettors

For simple, safe, one-handed operation

- Pipettes fit smoothly into its flexible tapered chuck.
- The thumbwheel on the side is rotated for precision filling or dispensing, and the plunger may be pressed for quick emptying.
- It is resistant to acids and alkalis. Disassemble all parts for cleaning and before autoclaving at 121°C (250°F) for 20 minutes except the chuck which should not be autoclaved.
- Each size is a different color for easy identification.

Item No.	Description	Pkg

Pipette Pump™ Pipettors

Pipette Pump™ II Pipettors

Features Rapid Release Valve for Quick Dispensing

- Glass or plastic pipettes are easily inserted into a unique collar with stabilizing fingers for a secure hold.
- Rotating the knurled thumb wheel draws liquid to the desired volume.
- To empty rapidly, apply light pressure to the fast release lever. For gradual dispensing, rotate the thumb wheel. They can be disassembled for cleaning.
- Sizes are color coded.

Pipette Pump™ II Pipettors

Pipette Controller

The rechargeable electronic pipetting aid is designed for use with glass or plastic serological pipettes in the 0.1 to 100mL volume range. It is lightweight and ergonomically designed for effortless pipetting even during extensive use.

Package Includes:

- 1 – Diamond Serologic portable pipette controller
- 2 – 1000mAh NiMH rechargeable batteries
- 1 – Battery charger
- 3 – PTFE membrane filters: (0.20 um and 0.45 um)
- 1 – Desktop stand
- 1 – Wall mounting bracket

Item No.	Description	Pkg
DLS3380	Diamond Serologic Portable Pipette Controller	1/cs

Transfer Pipettes

Produced from a custom grade of low-density polyethylene (LDPE), these unbreakable one-piece pipettes are used to draw and dispense liquids in controlled, reproducible drop sizes.

PrepSafe™ Microcentrifuge Tube Mini Floating Racks

Easily transfer samples from a water or ice bath to a vortexer

- Patent pending tabs on rack differentiate it from other floating microcentrifuge tube racks - included vortexing attachment accessory allows entire rack to be used with vortexer.
- Unique immobilizing tabs protect your samples from loss and contamination. Place tubes in slots and slide under tabs to keep tubes from opening when under pressure, submerged or knocked over.
- Design features include numbered locations for up to twelve 1.5 mL or 2.0 mL microcentrifuge tubes, raised handle for easy lifting without agitating samples and stable feet to keep racks upright on the bench.
- 95mm outer diameter fits most 1000 mL beakers.
- Steam autoclavable at 121°C (250°F) .

Plastic Test Tube Racks

Polypropylene test tube racks store flat and snap together to maximize space

- These racks allow multiple samples to be incubated at the same temperature. These racks can be used in freezers without deforming or going brittle. They will not rot or rust and are stackable when empty.
- Alphanumeric markings are molded into the racks to provide easy test tube identification. Racks do not float in water baths.
- Racks are autoclavable at 121°C for 20 minutes and sold individually.

Grip Racks

Specially designed test tube rack features rubber grips that hold test tubes in place when decanting liquid

- These grip racks are 50-position plastic racks in blue.
- DLS456920 holds tubes up to 17mm, measures 254 x 140 x 51mm and is a low profile rack to view labels easily.
- DLS456925 holds tubes up to 16mm and features a unique tube ejector that allows the user to easily eject all tubes. This rack with ejector measures 260 x 140 x 82mm.

Item No.	Description	Pkg
DLS456920	Rack w/ Grippers, 17 mm Tubes	1/cs
DLS456925	Rack w/ Grippers/Ejector, 16 mm Tubes	1/cs

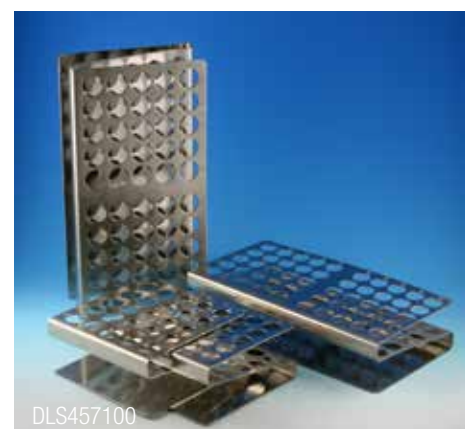

Stainless Steel Racks

Racks are rust-proof and will hold up to repeated use

- Stainless steel "Z" shape allows the racks to stack neatly inside one another to conserve benchtop space when not in use.
- The wide base provides stability and prevents tipping.

Item No.	Description	Pkg
DLS457100	12/13 mm, 25-Place	1/cs
DLS457105	12/13 mm, 50-Place	1/cs

DLS457205	16/17 mm, 50-Place	1/cs

Wall-Mount Drying/Draining Rack

This 72 place laboratory drying rack is perfect for draining and drying of all types of labware

- The 72 (push-in) pegs can accommodate items with a neck bore in excess of 15mm. They are easily removable for cleaning or to accommodate odd shaped items. Also included are 11 small pegs to accommodate small diameter items, such as test tubes, with a neck bore in excess of 6mm.
- The back plate of the support is made from a single mold of 4mm rigid high impact polystyrene (HIPS). The peg sockets have closed ends eliminating leakage and consequent biohazards. The seamless drip channel collects waste which drains via a drain tube.
- **Rack system includes:**
72 interchangeable pegs, 11 small pegs, drip channel with draining hose, mounting kit and template for hanging and hooks for joining together additional racks.
- **Rack dimensions:**
17.7"W x 24.8"H x 4.3"D (450mm x 630mm x 110mm)
- **Peg Dimensions:** 3.7" L x 0.6" Diam. (95mm x 15mm)

NOELR161WWW0

NORLAKE® Scientific General Purpose Laboratory Refrigerator

Ideal for cold storage of samples and reagents in the lab

- Preset at an operating temperature of 4°C. Automatic defrosting.
- Automatic door closer minimizes temperature gradients and ruined samples.
- Complete cabinet is insulated with foamed-in-place with CFC-free high-density polyurethane foam
- Includes two adjustable and two fixed wire shelves
- **Capacity:** 16.7 ft³ (.473m³)
- **Exterior:** 64-½" (163.8cm) H x 32" (81.2cm) W x 28-½" (72.4cm) D
- **Interior:** 52" (132cm) H x 27.5" (69.8cm) W x 21.5" (54.6cm) D

NOESSUF191WW0

NORLAKE® Scientific Ultra-Low Upright Freezers

Store samples with confidence at -50 to -86°C

- Multiple points of door sealing ensures reliable frost resistant performance and enhances energy efficient cold performance for long term sample security and storage.
- Select™ control system includes real-time clock, even logging alarm history, advanced alarms, memory functions and can be password protected at two levels.
- Select™ Refrigeration includes an exclusive engineered super capacity (tri-tube) capillary tube system (patent pending) and two advanced low-noise compressors to deliver optimal heat removal and superior low temperature performance — all using readily available, CFC-free refrigerants.
- Advanced security, electrical protection and fault alarms designed to protect and maintain integrity of your important samples and specimens.

3M® Disposable Filtering Facepiece Respirators

Respiratory protection against non-oil based particles

- 3M® N95 Respirators are lightweight, compatible with a variety of eyewear and feature an adjustable nosepiece for a custom seal. Curved low profile design conforms well to nose and eye contours.
- The three-panel disposable respirators are designed to direct exhaled air away from the nose panel, helping reduce eyewear fogging.
- The MMM9211 and MMM8511 feature the 3M® CoolFlow™ Valve for increased comfort and keeps the wearer cool.

Item No.	Description	Pkg

Scienceware® Magic Touch® 2™ Ice Bucket and Pans

Scienceware® Magic Touch® 2™ Ice Buckets and Pans

Maintain proper sample temperature between procedures

- Superior insulating properties combined with high chemical resistance.
- Expanded urethane icewares are lightweight, durable and non-sweating.
- Impervious to moisture and odors.
- Compatible not only with wet ice, but also with ultra-low temperature materials including dry ice, ice-salt slurries, dry ice solvent
- Able to withstand a wide temperature range: -196°C (-320°F) to 100°C (212°F).
- Drip-proof rims keep the benchtop dry.

Labeling Tape

Variety of tape for labeling samples and supplies

- **Write-On™ Label Tapes** adhere to any clean surface, including Teflon® fluoropolymer resin coated materials, and peels off without leaving a sticky residue. Pencil, ball-point pen or solvent ink marker remain legible under the most demanding laboratory conditions.
- **Write-On™ Label Tape Assortment Pack** includes six tape colors that correspond with familiar hazard color codes to highlight safety information written on the labels. Use yellow for chemical reactivity, green for safety labels, blue indicates health hazards, red alerts to flammability; orange indicates a biohazard and white can describe a specific hazard.
- Identification Tape works great for color-coding supplies.

APO140016PDC

Securline Brand Laboratory Markers

Securline Laboratory & Superfrost Markers are for both general and specialty use within the lab setting. The Superfrost markers are specifically designed for writing on frosted microscope slides and can resist most solvents used in histology and cytology (alcohol, acetone, xylene). The basic Laboratory Markers can be used for writing on plastic, metal, or porcelain products for quick labeling needs within the lab. The Laboratory Markers are able to withstand autoclave sterilization.

MagStir and Multi MagStir Genie® Magnetic Stirrers

Programmable stirrers go through up to nine phases of ramp-up, low speed, high speed and intervals

- MagStir is a single-position unit; Multi MagStir is a four-position unit.
- MagStir operates at 10-1800 RPM, Multi MagStir operates at 10-1200 RPM
- Simple to program multiple parameters: ramp rate, speed, direction, stir time and pause time
- Three power levels for different viscosity liquids
- **Maximum capacity:** 5kg (11 lb.) for MagStir, 10kg (22 lb.) for Multi MagStir
- **MagStir:** 200 x 160 x 55mm (7.9 x 6.3 x 2.2")
- **Multi MagStir:** 375 x 325 x 48mm (14.7 x 12.8 x 1.9")

Item No.	Description	Pkg
SIQSI0300	MagStir Genie®, 120V/100V	1/ea
SIQSI3000	Multi MagStir Genie®, 120V/100V	1/ea

MegaMag Genie® Stirrers

High speed analog and digital stirs up to 38 liter containers

- Powerful rare earth magnets stay coupled under the most demanding stirring conditions.
- Rugged ABS housing and Vortex Genie® motor.
- Digital models offer a smooth ramp-up and timer from 1 to 99 minutes
- May be used in cold rooms or incubators
- 2 year warranty
- Top Surface Dimensions 305 x 305mm (12 x 12in) (D x W)

Item No.	Description	Pkg
SIQSI2236	MegaMag Genie®, 120V	1/ea
SIQSI3236	Digital MegaMag Genie®, 120V	1/ea

Bel-Art Rare Earth Spinbar® Magnetic Stirring Bars

Ideal for viscous solutions, high speed stirring and extended stirring applications

- Rare Earth, Samarium Cobalt magnet provides strong coupling with drive magnets to reduce frequency of spinout.
- Octagon shape with pivot ring creates strong turbulence with minimal chattering and friction
- Distinctive green color for easy identification and visibility

Item No.	Description	Pkg
BRT371020003	Spinbar, Oct, SMCO, Mag Stir Bar, 3" x 1/2"	1/ea
BRT371020138	Spinbar, Oct, SMCO, Mag Stir Bar, 1" x 3/8"	1/ea
BRT371020238	Spinbar, Oct, SMCO, Mag Stir Bar, 2" x 3/8"	1/ea
BRT371021238	Spinbar, Oct, SMCO, MAG STIR BAR, 1/2" x 3/8"	1/ea

Bel-Art Egg-Shaped Spinbar® Magnetic Stirring Bars

Ideal for stirring in round-bottom vessels

- Built-in pivot spot ensures chatter-free motion.
- While the larger sizes offer oval magnets, the two smallest magnets are cylindrical in shape sheathed in an oval PTFE outer capsule.
- Teflon® PTFE coated with ALNICO V encapsulated magnet.

Item No.	Description	Pkg
BRT371300001	Spinbar, Stirring Bar, Teflon, Egg-Shaped, 1" x 1/2"	1/ea
BRT371300003	Spinbar, Stirring Bar, Teflon, Egg-Shaped, 3" x 3/4"	1/ea
BRT371300034	Spinbar, Stirring Bar, Teflon, Egg-Shaped, 3/4" x 3/8"	1/ea
BRT371300038	Spinbar, Stirring Bar, Teflon, Egg-Shaped, 3/8" x 3/16"	1/ea
BRT371300112	Spinbar, Stirring Bar, Teflon, Egg-Shaped, 1-1/2" x 5/8"	1/ea

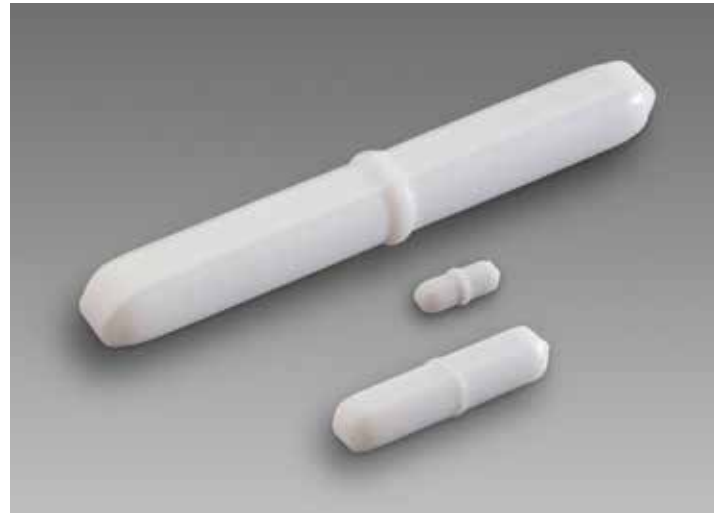

Bel-Art Octagonal Spinbar® Stirring Bars

Most commonly used due to the interrupted profile

- Pivot ring aids in reducing chattering or skipping.
- Teflon® PTFE coated with ALNICO V encapsulated magnet

Item No.	Description	Pkg
BRT371090034	Spinbar, Stirring Bar, Teflon, Octagon, Red, 1/2" x 1/8"	1/ea
BRT371100001	Spinbar, Stirring Bar, Teflon, Octagon, 1" x 5/16"	1/ea
BRT371100002	Spinbar, Stirring Bar, Teflon, Octagon, 2" x 5/16"	1/ea
BRT371100003	Spinbar, Stirring Bar, Teflon, Octagon, 3" x 1/2"	1/ea
BRT371100112	Spinbar, Stirring Bar, Teflon, Octagon, 1-1/2" x 5/16"	1/ea
BRT371100118	Spinbar, Stirring Bar, Teflon, Octagon, 1-1/8" x 5/16"	1/ea
BRT371100238	Spinbar, Stirring Bar, Teflon, Octagon, 2" x 3/8"	1/ea

Bel-Art Polygon Spinbar® Magnetic Stirring Bars

Features center molded pivot ring for reduced friction and chattering

- Multifaceted surface transfers more torque to the liquid being stirred when compared to non-faceted cylindrical stir bars of the same size.
- Plastic container surfaces are less prone to being scratched or marked by the spinning bar.
- Teflon® PTFE coated body with ALNICO V encapsulated magnet.

Item No.	Description	Pkg
BRT371220025	Bar, Stirring, Polygon w/Ring, 25 x 6 mm	1/ea
BRT371200002	Bar, Stirring, Teflon, Polygon, 2" x 3/8"	1/ea
BRT371200003	Bar, Stirring, Teflon, Polygon, 3" x 1/2"	1/ea
BRT371200030	Bar, Stirring, Teflon, Polygon, 30 x 8 mm	1/ea
BRT371200040	Bar, Stirring, Teflon, Polygon, 40 x 8 mm	1/ea
BRT371200050	Bar, Stirring, Teflon, Polygon, 50 x 8 mm	1/ea
BRT371220070	Bar, Stirring, Teflon, Polygon, 70 x 10 mm	1/ea
BRT371200112	Bar, Stirring, Teflon, Polygon, 1-1/2" x 3/8"	1/ea
BRT371207836	Bar, Stirring, Teflon, Polygon, 7/8" x 3/16"	1/ea

Bel-Art Specialty Spinbar® Spinning Bars

For aggressive stirring requirements, these spinning bars offer some unique benefits

- Spinbar Disposable stirring bars are designed for single use applications. They are an economical way to avoid cross contamination. Teflon® PTFE coated with ALNICO V encapsulated magnet.
- Spinbar Giant stirring bar can easily mix large liquid volumes in containers using strong magnetic stirring machines. The bar needs minimum neck diameter of 32 mm to be inserted into container. Ideal for stirring large volumes in carboys, tanks or drums. Teflon® PTFE coated with ALNICO V encapsulated magnet.
- Spinbar Micro stirring bar is ideal for vials, micro test tubes and centrifuge tubes. Teflon® PTFE coated with ALNICO V coated magnet.
- Durable, Spinfinity™ magnetic stirring bars last 2.5 to 3 times longer than PTFE magnetic stirring bars in abrasive slurries and other applications known to cause material breakdown. Alnico magnet encapsulated in plastic for zero porosity; no corrosion and cross contamination. Ideal for pharmaceutical, Q/A laboratories and ppb and ppt applications. 3 x ½" octagon shape with molded-in pivot ring, which reduces friction and chattering.

Spinpak® Magnetic Stirring Bar Assortment Packs and Restrainer

Stirring bar assortment pack offers a variety of commonly-used sizes.

- BRT371580010 includes ten octagon Spinbar® Magnetic Stirring Bars. They are Teflon® PTFE coated, with pivot ring. This pack includes a restrainer to keep the stir bar from emptying with the solution.
- BRT371600000 includes six octagon Spinbar® Magnetic Stirring Bars. They are Teflon® PTFE coated, with pivot ring. The pack contains two of each: (1" x 5/16") (1½" x 5/16") (2" x 5/16").

Skin Markers (sterile and non-sterile)

Our skin markers contain medical-grade, non-irritating gentian violet ink

A large ink reservoir allows for a longer product life and also helps provide constant ink flow for clear marking. We have a variety of barrel and tip styles available. We offer sterile markers for intra-op and non-sterile for the pre-op area. Configurations that include a 15cm (6") ruler or ruler with labels are also available.

Item No.	Description	Pkg

Impervious Stockinettes

Useful for handling limbs in the OR

- Impervious outer layer for protection; fibrous inner layer for comfort
- Sterile stockinettes provide a strong barrier for preventing fluid strikethrough
- Flip-folds allow for easy application

NON22520

Cotton Woven Gauze Sponges

Made from 100% cotton for super absorbency

- Choose from the premium Medline or more economical Caring standard grades.
- All sponges are produced in a strictly controlled manufacturing process. This assures clean, debris-free packing with folded edges to prevent unraveling and minimize particulate contamination. Sponges are packed in easy-open envelopes which are carefully sealed to prevent the intrusion of dust and contaminants.
- Standard grade sponges have open edges and are packaged in sealed envelopes.

J&J Ethicon® Sutures

Sutures from the name in wound care

- Ethibond Excel™ Sutures are nonabsorbable, braided, sterile, surgical sutures composed of Poly (ethylene, terephthalate) and uniformly coated with a nonreactive nonabsorbable compound to improve handling qualities. The suture is braided for optimal handling properties, and dyed green for enhanced visibility in the surgical field. SUTUPAK are precut sutures.
- PROLENE™ Polypropylene Sutures are non-absorbable, sterile surgical suture pigmented blue to enhance visibility. It is indicated for use in general soft tissue approximation and/or ligation.
- PDS™ II (polydioxanone) monofilament synthetic absorbable sutures are prepared from the polyester, poly (p-dioxanone) for an absorbable monofilament with extended wound support (up to six weeks) and outstanding pliability. Indicated for use in soft tissue approximation.
- A very small sampling of Ethicon sutures are shown. Contact us if you need a suture not listed here.

FRIO-Temp® Liquid-In-Glass Verification Thermometers

Verify sample temperatures with traceability to NIST (and most standards through ILAC)

- Thermometers provide indication for relative liquid sample temperature in freezers, refrigerators, incubators and ovens.
- Each FRIO-Temp thermometer features individual serial numbers and a multi-language (English, French, German, Italian, Portuguese and Spanish).
- Tested and calibrated in an exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST.
- PFA-coated thermometers provide added safety.
- Packaged individually or in cases of 5 thermometers. To order individually, add "H" to the end of the item number shown.

Enviro-Safe® General Purpose Liquid-In-Glass Thermometers

View accurate temperature results without mercury hazards

- Enviro-Safe® Thermometers feature 1°C accuracy or better, are filled with an environmentally safe non-toxic, non-hazardous, biodegradable Enviro-Safe liquid EnviroKleen™ certified by an independent laboratory. This fill provides the same accuracy as similar mercury types, but without the hazards.
- Results indicated from the green liquid level on a white background.
- Thermometers include a multi-language (English, French, German, Italian, Portuguese and Spanish) Statement of Accuracy indicating accuracy traceable to NIST and individual serial number. Tested and calibrated in an exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST.
- Thermometers with traceable certification and calibration report are available. Contact us for more information.
- Individually packaged. Item numbers listed are sold 25/cs except BRT20527 which is 5/cs. To order individually, add "H" to the end of the item number shown.

DURAC® Refrigerator/Freezer Thermometer

Thermometer provides clear indication of thermal conditions in a refrigerator or freezer

- Clips onto a rack, saving shelf-space.
- Design magnifies display for easier visualization of results.
- Sold in a case of 25. To order individually, add "H" to the end of the item number shown.

Specifications

Range	-40/80 °F; -40/27 °C
Case Type	Steel
Dimensions	4.9" (124mm) length
Accuracy	1°C; 2°F
Case Qty.	25
Item No.	BRT30305

DURAC® Digital Dual Thermometer

Triple display can show input temperature simultaneously with maximum and minimum data

- This digital thermometer displays the current, maximum and minimum temperatures simultaneously with the ability to switch between the built-in thermometer or probe thermometer temperature displays. This can be used for indoor and outdoor monitoring or room and chamber monitoring.
- Additional features include a high/low alarm, low battery indicator, 30mm (1.2 in) probe with 3 meter (9.8 ft) cable, mounting keyhole and multi-language (English, French, German, Italian, Portuguese and Spanish) instructions and Statement of Traceability indicating accuracy traceable to NIST and DAkkS.
- Items are CE marked and RoHS compliant. Tested and calibrated in an exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST.
- This thermometer display the current temperature and register the maximum and minimum temperatures attained since the last reset.
- Individually packaged in a case of 10. To order individually, add "H" to the end of the item number shown.

Specifications

Probe Sensor	Waterproof, 30mm with 3m cable
Built-in Thermometer Range	0/50 °C, 32/122 °F
Probe Thermometer Range	-50/70 °C, -58/158 °F
Resolution	0.1
Battery Type	(1) AAA
Dimensions	3.9" (98mm) W x 4.3" (110mm) H
Accuracy	1°C; 2°F
Traceable to NIST	Yes
Case Qty	10
Item No.	BRT3817

DURAC® Timers

Timers available from single to triple channel to track one or up to four reactions

- Each timer includes multi-language instructions (English, French, German, Italian, Portuguese and Spanish) and is CE marked and RoHS compliant.
- Each timer is individually tested and inspected in an exclusive triple accredited/registered ISO/IEC 17025:2005, A2LA accredited laboratory against equipment whose calibration is traceable to NIST and DAkkS, and includes a Statement of Traceability indicating accuracy traceable to NIST and DAkkS.
- Timers are sold 20/case.

Microcentrifuge Tubes

These tubes are offered with attached caps or without caps. Graduated tubes facilitate accurate sampling. The polypropylene tubes are resistant to most chemical reagents and can be autoclaved at 130°C. The polyethylene tubes are softer and can be easily cut to provide access to material at the bottom of each tube.

Screw Cap Micro-centrifuge Tubes

Disposable screwcap micro-centrifuge sterile tubes include a cap with nitrile O-ring.

- Tube = Polypropylene
- Cap = Polypropylene
- O-Ring = Nitrile
- Centrifuge Maximum RCF – 18000 RCF

Item No.	Description	Pkg
DLS111710	1.5 mL tube with O-ring cap, sterile	1000/cs
DLS111730S	2.0 mL tube with O-ring cap, sterile	1000/cs

Non-Graduated, Attached Cap

Item No.	Description	Pkg
DLS110540	500 µL (0.5 mL), Beckman Type, polyethylene, non-autoclavable	1000/cs
DLS110560	600 µL (0.6 mL), polypropylene	1000/cs

Graduated, Attached Cap – Polypropylene

Item No.	Description	Pkg

Self-Standing Centrifuge Tubes

General use self-standing centrifuge tubes for everyday laboratory needs.

30 mL Self-Standing

- Cap is made from polypropylene (PP)
- Conical bottom with skirt
- Non-graduated
- Non-sterile

Spin Rate:

Polystyrene (PS): 4000 RPM

Polypropylene (PP): 5000 RPM

Item No.	Description	Pkg
DLS109217	Self-Standing, 30mL, PS	500/cs
DLS109220	Self-Standing, 30mL, PP	500/cs

30 mL Self-Standing with Spoon

- Cap is made from polypropylene (PP)
- Spoon is made from polystyrene (PS)
- Conical bottom with skirt
- Non-graduated
- Non-sterile
- Remove spoon before placing in centrifuge

Item No.	Description	Pkg
DLS109117	Self-Standing, 30mL, PS, with spoon	500/cs
DLS109120	Self-Standing, 30mL, PP, with spoon	500/cs

50 mL Self-Standing, Polypropylene – Printed Graduations

- Cap is made from High Density Polyethylene (HDPE)
- Sterile tubes are RNase/DNase and Pyrogen free
- White graduations and writing area
- Autoclavable (without screwcap)
- Spin Rate: 5000 RPM (6160 x g)

Item No.	Description	Pkg
DLS6255	50 mL, non-sterile	500/cs
DLS6256	50 mL, sterile	500/cs

Culture Tubes

These plastic culture tubes are produced in polystyrene or polypropylene. The dual position ribbed cap provides either aerobic or anaerobic storage of samples. Note: Leave the cap in the loose position for aerobic work and in the sealed position for anaerobic cultures.

Material

- Tube: Choose from polystyrene (PS) or polypropylene (PP)
- Cap: Low density polyethylene (LDPE)

Item #	Description	Units
12 x 75mm		
DLS110410	12 x 75 mm Polystyrene (PS)	1000/bag, 1000/cs

DLS110178	17 x 100 mm Polypropylene (PP), with dual position cap, sterile	25/bag, 20 bags/cs, 500/cs
DLS118118	Dual position cap for 17 mm culture tubes, polyethylene (LDPE) bulk	1000/cs

Borosilicate Glass Culture Tubes

These borosilicate glass culture tubes feature well-rounded bottoms and smooth, fire polished rims. Dimensional specifications are rigidly controlled for reliable, uniform results. Can be used for tissue cultures and blood banks.

Features

- Made from superior quality borosilicate glass to reduce pH changes and contaminants that are potentially leached from tubes made from soda lime glass
- Produced in an ISO 9001:2008 certified factory
- **Packaging:** 250/box, 4 boxes/case

Technical Specifications

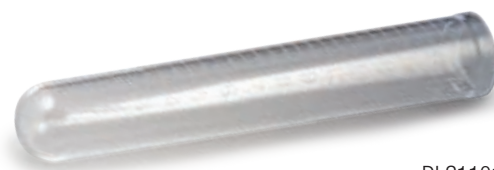

- **Material:** Type 1, Class A Borosilicate Glass
- Tubes are chemically inert
- Meets ASTM E890 specification, Type 1 requirements
- Conforms to USP Type 1 standards
- **Melt temperature (Log n=4):** 1460°C (+/- 20°C)
- **Softening point (Log n=7.6):** 1220°C (+/- 20°C)
- **Freezing point:** -50°C

Plastic Test Tubes

These multi-use tubes are modified from premium-grade polystyrene for clarity, or polypropylene for impact strength and stability to common acids, alkalis and solvents. Polystyrene tubes can withstand 1500 RPM. Polypropylene tubes can withstand 3000 RPM, and are autoclavable and freezable.

Transport Tubes

Store and transport liquids and samples safely between locations.

- Polypropylene tubes are self-standing with conical bottoms.
- Graduated tubes aid with volume determinations.
- Polyethylene screw caps are included and packaged separately.

Item No.	Description	Pkg
DLS6101	Transport Tube, 5mL, 16 x 56 mm	1000/cs
DLS6102	Transport Tube, 10mL, 16 x 96 mm	1000/cs

Kimble Screw-Thread Sample Vials

Quality glass vials for low sample reactivity

- Vials include black phenolic closures and are packaged in corrugated trays with partitions.
- CSF60910L2 is in shelf-packs of 72 vials and sold in a case of 8 packs.
- Other sizes and cap types available. Contact us for more information.

Glass	Capacity	Closure	Height	Thread	Case Qty	Item #
Clear KG-33	1 dram	Attached, PTFE/ White Rubber	45 mm	13-428	144	CSF60811B1
Amber	1 dram	Attached, PTFE/ White Rubber	45 mm	13-425	144	CSF60911B1
N-51A Borosilicate	2 drams	Separate, Rubber-lined	60 mm	15-425	576	CSF60910L2

Kimble Scintillation Vials

Scintillation vials are made from KG-33 borosilicate glass for low background counts

- Vials have a 22mm cap size and include white urea caps with Polyseal® cone liners.
- Vials, with caps attached, are packaged in cellular trays with alphanumeric coordinates for fast, easy identification. Each tray contains 100 vials, five trays per case.
- Other sizes and cap types available. Contact us for more information.
