

# Push-Button Safety IV Catheter

McKesson's Prevent® R push-button safety IV catheters sample blood or administer fluids intravenously. The retractable safety IV catheters feature a push-button style needle retraction safety mechanism. Ergonomically designed to address clinicians' needs, the retractable safety catheters contain push-off tabs and contoured molding for a secure grip and to enable one-handed catheter advancement. Clinicians can use one-handed or two-handed techniques. The flashback chamber provides a clear visual confirmation of successful venipuncture. Winged hub options provide a larger surface area for easier application of tape or other catheter securement devices and are ideal for accessing small or fragile veins.

## FEATURES AND BENEFITS

- Triple facet, back cut, beveled needle
- Gently tapered catheter tip
- Push-button style needle retraction safety mechanism
- Push-off tab
- Flashback chamber allows for clear visual confirmation that catheter has entered the vein
- Audible click lock safety mechanism ensures the needle is safely encapsulated in the catheter body for safety through point of disposal
- Encapsulating needle shield encases the needle when safety mechanism is activated
