

# High Frequency Electrosurgical Desiccator

McKesson Argent MFR# 22-A942 high frequency electrosurgical desiccator is a 40 watt desiccator that's used by dermatologists and other physicians for wart, mole and skin tag removal and procedures requiring light coagulation. The MFR# 22-A952 high frequency electrosurgical desiccator features a generator (isolated) and a high frequency desiccator (ground referenced) in one unit. It provides plenty of power for most cutting procedure performed in the doctor's office. MFR# 22-A952G OB/GYN total system is packaged with the essential accessories needed to perform an OB/GYN LEEP procedure.

## Features and Benefits

### MFR# 22-A942 High Frequency Electrosurgical Desiccator

- » Digital power-control system allows simple knob rotation or use of up/down buttons on the handpiece
- » Eliminates the multi-step process of changing from low to high power
- » Handpiece works with or without the optional footswitch. Plug in the footswitch, maintaining power control and activation from the handpiece
- » 40 watts
- » Adjustable in 1/10 watt increments up to 10 watts, 1 watt increments above 10 watts
- » Output frequency of 410 kHz, line frequency of 50-60 Hz
- » Universal power supply, 100-240 VAC
- » Not made with natural rubber latex
