

COLPOSCOPES

McKesson Lumeon colposcopes are available in binocular or camera-ready trinocular configurations, and in both centerpost and articulating arm designs. They feature super-bright LED illumination to provide ample light for any application. Each colposcope comes complete with dust cover, power cord, manual, tool kit, and is backed by a 7 Year Limited Warranty*. Optional accessories are also available to enhance your lab's colposcopy capabilities.

The Lumeon articulating arm LED colposcope is designed with your viewing comfort in mind. It offers precision optics and rock-steady articulating arm suspension. To make head positioning easy it comes with locking casters and stainless steel handlebars. Smooth, continuous zoom and LED illumination provide ultra-clear viewing with ample light for any application. The colposcope's low center of gravity increases stability and maneuverability, while its sturdy, three-legged base with EZ-Roll locking casters allows for easy transport from room to room.

FEATURES AND BENEFITS

ARTICULATING ARM LED COLPOSCOPE

- Smooth and steady articulating suspension arm
- Low center of gravity for enhanced stability
- Smooth, continuous magnification from 4x-27x
- Variable intensity rheostat viewer with LED illumination
- 298 mm working distance
- 55 to 75 mm interpupillary distance adjustment
- Adjustable head inclination with a range from 45-90°
- Sturdy, three-legged base with EZ-Roll locking casters for easy transport

COLPOSCOPES

McKesson Lumeon LED colposcopes feature smooth, continuous zoom 4x to 27x magnification with 20x eyepieces and sharp focus for 3D imaging. Available with either a binocular or video-ready trinocular head, both models are equipped to offer a 298-millimeter working distance. The field of view (FOV) ranges from 58.5 millimeters at 4x, to 8.5 millimeters at 27x. Dual-diopter adjustments allow clinicians to separately adjust eyepieces for reduced eyestrain. This colposcope features a sturdy, five-leg mobile base. It also includes a built-in green filter, as well as an ultra-bright LED illumination system with variable rheostat to provide ample light for any application.

FEATURES AND BENEFITS

LED COLPOSCOPES

- High eyepoint 10x paired eyepieces help reduce strain
- Dual diopter offers independent eyepiece focus control
- Continuous zoom optics remain in focus through entire range
- 298 mm working distance (11.75 in)
- Dual diopter offers independent eyepiece focus control
- 5 LED array: 4 white, 1 green
- Built-in green filter for applications where one is required
- Five-leg base is easy to maneuver; slides in and under exam tables for optimal positioning
- Available with binocular or video-ready trinocular head

COLPOSCOPES

Expand the capabilities of your colposcopy instruments and keep them in peak condition with Lumeon replacement parts and accessories. The Lumeon color video monitor is a specialized accessory that can be helpful in viewing or photographing abnormalities or injuries invisible to the naked eye. The Lumeon 0.3x reducing objective lens is a replacement zoom stereo body lens custom-made to work with our vast Lumeon line of colposcopes. Replacement halogen bulbs are also available to accommodate non-LED models of Lumeon brand colposcopes, which have been discontinued.
