

Moisture Wicking Fabric with Silver

McKESSON

McKesson moisture wicking fabric with silver provides an effective solution for managing moisture, friction, and microbial contamination in skin folds and other skin-to-skin contact areas. Made of stretch polyester fiber impregnated with antimicrobial metallic silver, the fabric helps keep skin dry, reduces odor-causing bacteria, and delivers antimicrobial protection for up to 5 days, depending on fabric soiling and moisture levels. With a low-friction polyurethane-coated surface and the ability to cut the material to size, the fabric supports patient comfort while helping reduce risks of skin complications. Both roll and sheet formats are individually packaged for single-patient use.

Features and Benefits

ANTIMICROBIAL PROTECTION

Provides antimicrobial action using metallic silver to help reduce and prevent colonization of bacteria and yeasts, including *Staphylococcus aureus*, *Staphylococcus epidermidis*, *Pseudomonas aeruginosa*, and *Candida albicans*

MOISTURE WICKING ACTION

Wicks and translocates moisture away from the skin to help keep skin folds and skin-to-skin contact areas dry

ODOR REDUCTION

Helps reduce odor-causing bacteria, supporting improved hygiene and patient comfort

FRICITION REDUCTION

Low-friction polyurethane-coated surface helps reduce skin-to-skin friction in high-risk areas, such as skin folds, under braces, cuffs, wraps, and immobilizers

PROTECTIVE ENVIRONMENT

Creates an environment that helps protect skin and reduce the risk of moisture-related complications

ANTIMICROBIAL DURATION

Offers effective antimicrobial action for up to five days, depending on moisture, soil level, and use conditions

SKIN FOLD MANAGEMENT

Supports the management of skin folds and other skin-on-skin contact zones

CUT-TO-SIZE FLEXIBILITY

Material can be cut to size to accommodate different anatomical areas and usage needs

SILVER CONTENT

features antimicrobial silver (Ag) integrated into the textile

Not made with natural rubber latex

A knitted polyester textile dressing with silver complex, the fabric provides effective antimicrobial action for up to five days depending on fabric soiling and the amount of moisture

Reduces Bacteria

Polyester fabric acts as a lubricant, reducing skin-on-skin friction

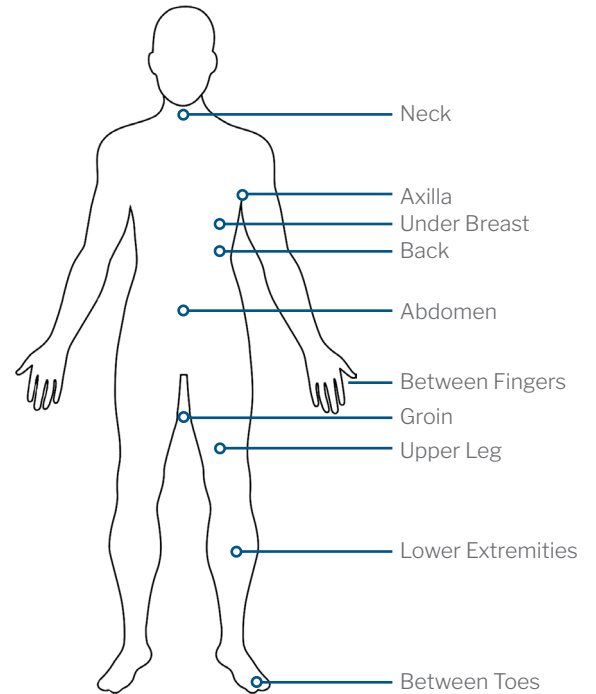

Reduces Moisture

Captures and transports moisture away from the skin

Reduces Odor

Device reduces colonisation of bacteria and yeasts within fabric

Possible Areas Affected
