

Endometrial Cell Samplers

McKesson Argent® Endometrial Cell Samplers are designed for minimally invasive uterine tissue collection. They help to eliminate the use of cervical dilation in most cases and offer less discomfort, bleeding and tissue abrasion. Elastometric seal piston plungers generate suction, while ridged, ergonomically-designed grips yield maximum control. McKesson Argent® Endometrial Cell Samplers are a patient-preferred alternative to the D&C method. They also serve as an excellent diagnostic and monitoring tool in other conditions that may affect uterine health.

Features and Benefits

- » Flexible design to enable smooth insertion and safe accommodation for uterine wall curvature
- » Effective suction system for quick specimen collection in outpatient settings
- » Clear sounding marks at every 1cm to help monitor precise extraction
- » Individually packaged to maintain sterility and intended for single use
- » Not made with natural rubber latex
