

Procedure face masks

McKesson procedure face masks are made in the USA and meet high quality and regulatory standards. Healthcare professionals wear face masks during medical procedures to protect both the patient and the medical personnel from the transfer of microorganisms, body fluids, and particulate material. Each mask includes strong ear-loops that are ultrasonically sealed and attached to the outside of the mask to prevent pulling and irritation. The adjustable, plastic-covered, iron nose-piece provides customized protection and comfort. The mask's three-layer construction features non-woven spunbond polypropylene outer and inner layers and a melt blown polypropylene middle layer. Sized to fit most users and tested to meet ASTM standards, McKesson offers Level 1 and Level 3-rated masks to accommodate your personal protection needs.
