

Rib Belt

The McKesson rib belt is the orthopedic solution used to provide compression and support for fractures and strains to the rib cage. The rib belt has a dual-panel, 6-inch design with a convenient contact closure that enables easy adjustment, proper support and protection and secure positioning without bunching, slipping, or rolling down. Available in universal size to fit most male or female users with a 28 to 50-inch chest circumference (measured at base of sternum).

Features and Benefits

- Provides compression and support for fractures and strains to the rib cage
- Low-profile, white material allows discreet support when worn over bare skin or undergarments as suggested for most effective use
- Pile/foam material creates a balanced solution of compression, support and protection for comfort and stabilization of injured ribs
- Breathable material for lasting comfort
- Designed to maximize performance without binding
- Hand wash with cold water and mild soap to maintain hygiene during extended time of recovery
- Universal size (28 to 50-inch)
- Not made with natural rubber latex
- **WARNING:** Neoprene supports should not be worn by individuals with known susceptibility to dermatitis or allergies to neoprene by-products
