

SIMPLE PORTABLE AFFORDABLE

What is the **NEXA** ADVANTAGE?

The **NEXA™** Negative Pressure Wound Therapy (NPWT) System is a **multi-week, multi-patient, disposable** product that provides negative pressure therapy for patients with chronic and acute wounds.

- Continues to remove fluid even in the presence of a minor dressing air leak
- Gradual and gentle foam compression / draw-down to help mitigate pain at start up
- Operates for 56 days (1344 hours)
 - ◆ Usable hours are depleted only when the device is on
 - ◆ Remaining hours can be used on another patient after simple wipe down
- Flexible EcoPouch™ Fluid Container uses much less plastic than rigid canisters and takes up much less shelf space

◆ SIMPLE:

- **With no complicated interfaces or touchscreens**, the ultra-simple, one-button operation requires minimal training and reduces the potential for user error
- **Sleek, streamlined design** with no maintenance required

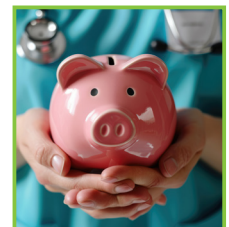

◆ PORTABLE:

- **Lightweight and small**, ideal for mobile patients
- **Handy carrying case** for patients on the go
- **Battery lasts 10 hours** before recharging

◆ AFFORDABLE:

- **Low daily device costs**
- **Immediate availability** with this off-the-shelf device that requires no tracking and incurs no runaway rental costs
- **Disposable device eliminates servicing** and maintenance costs

ORDERING Information

Product	Description	McKesson Item #	AOTI Part #	UOM
