Safety

Keep out of reach of children. This product is appropriate for adult use. The product formulation, production, safety evaluation and documentation comply with Essity's rigorous standards. Production complies with current good manufacturing practices (cGMP). The active ingredient has a long history of safe use.

First aid

If discomfort occurs after eye contact, rinse thoroughly with plenty of water for 15 minutes, lifting and lowering eyelids. Consult a physician. If discomfort occurs after skin contact, wash the skin with soap and water. If irritation persists, consult a physician. Upon ingestion of larger amounts, clean the mouth with water and drink plenty of water afterwards. Where appropriate, consult a physician.

Physical properties

Appearance: opaque, off-white, thick

Physical state: thick semi-solid

Smell: fragrance free

pH: not applicable

Storage and period of use

Best before: 24 months after production date (see package).

Recommended storage: It is recommended that TENA ProSkin™ Protective Cream is stored above 59° F, but not above 86° F (15° C-30° C). Exposure to high temperatures will accelerate the aging of the product and the product durability cannot be guaranteed.
