

Portable Transport Stretcher

The McKesson portable stretcher transports, transfers, or rescues patients from areas inaccessible to standard stretchers. It is not intended for use when the patient needs spinal stabilization or traction. Use at least four people to lift, transfer, or transport to reduce the risk of accident or injury. Hands holding straps must be directly across from each other, do not "cross-handle." The compact design makes McKesson portable transport stretchers easy to store, transport, and deploy. Its strong material and durable construction holds up to 1,000 lbs.

Features and Benefits

- Transports, transfers, or rescues patients from areas that are inaccessible to standard stretchers
- Reinforced with straps to allow a minimum of four people to safely lift patients up to 1,000 lbs
- Has 14 handles; 6 on each side of the 80-inch length and 1 on each side of the 40-inch length
- Flexible, fluid resistant nonwoven material
- Portable; folds away easily and requires minimal storage space
- Lightweight (1.5 lbs)
- Disposable/limited use
- Not made with natural rubber latex
