

## INCENTIVE SPIROMETERS

Lumeon incentive spirometer is a device that measures a patient's breathing volume, providing an incentive for the patient to improve their ventilation. The patients are advised to inhale slowly and deeply using the device. The volumetric incentive spirometer provides visual assistance in measuring the volume achieved during inhalation, while also promoting the maintenance of an appropriate inhalation rate. This is achieved by ensuring that the yellow ball remains within the designated section of the device, which is represented by a smiley face. It is a device used in respiratory therapy for adult patients. It is intended for a single patient use, and it can be used both in the medical center and outside of it (homecare therapies). The technique is widely employed in prophylaxis and treatment of respiratory complications in postsurgical patients.

### FEATURES AND BENEFITS

- Easy to perform breathing exercise
- Ergonomically designed to hold
- Adjustable mouthpiece with flexible tubing
- DEHP free
- Not made with natural rubber latex

### VOLUMETRIC INCENTIVE SPIROMETER

#### Inspiratory Indicator

Offers visual assistance in measuring the volume attained during inhalation, while also promoting the maintenance of an appropriate rate of inhalation

#### Easy to Carry

Ergonomically designed to hold

#### Volume Scale Printed on Both Sides

Clear identification of volumes

#### Adjustable Target Indicator

Provides a volumetric guideline

#### Adjustable Mouthpiece with Flexible Tubing

Mouthpiece allows the patient to easily adjust for use in various positions
