

# Biohazard Sharps Containers

McKesson's Prevent® biohazard sharps containers are made of puncture- and leak-resistant plastic to help protect our customers by limiting their exposure to sharps. Most containers are nestable to maximize valuable storage space, and many have OSHA-compliant features such as touchless deposit and visible fill-level indicators (see [mms.mckesson.com](https://mms.mckesson.com) for product details). Our biohazard sharps containers are compatible with many existing wall cabinets and brackets for security and unwanted access prevention.

## FEATURES AND BENEFITS

- Made of OSHA-compliant, puncture-resistant plastic
- Horizontal drop helps to maximize capacity
- Translucent lid allows for visual monitoring
- Nestable for compact storage prior to use
- Touchless deposit prevents unwanted access to contents
- Locking lid ensures safe transport
- Single use
- Not made with natural rubber latex
