

## Enteral Feeding Tube Securement Device

The McKesson enteral feeding tube securement device comfortably and discreetly secures a G-tube, J-tube, or PEG-tube beneath clothing. Its innovative design eliminates the need for pins and tape, reducing skin irritation and discomfort. The pouch features a hook-and-loop closure flap with grip tab and provides a secure, discreet place to tuck away coiled tubing while not in use. The feeding tube fits through a slit on the back of the pouch to help reduce tension.

### Features and Benefits

- Comfortably and discreetly secures a patient's G-tube, J-tube, or PEG-tube beneath clothing
- Eliminates the need for pins and tape
- Reusable and washable: close fasteners before washing, machine wash frequently with a mild disinfectant, and hang to dry (do not machine dry)
- Specially designed to facilitate most enteral feeding systems
- Helps reduce skin irritation and discomfort associated with taping
- Helps minimize the risk of accidentally pulling out the tube in uncooperative or combative patients
- Small/Medium size includes a 27-inch elastic strap fits waist sizes from 30 to 45 inches
- Large/X-Large size includes a 44-inch elastic strap fits waist sizes from 45 to 60 inches
- Not made with natural rubber latex
