

# StingFree™

## Alcohol-Free Liquid Skin Prep & Shield

StingFree foam tipped wand applicators provide a more precise application and worry free hand contamination. No sting, alcohol free protection. Forms a quick-drying transparent protective film between skin and contaminants. Aids in the prevention of skin maceration.

### Benefits:

- Non irritating
- Long lasting waterproof barrier between skin and bodily fluids, adhesives, and frictional forces
- Will not clog incontinence briefs or absorbent pads

### Indications:

- To protect against excessive moisture due to wound exudate, tube drainage or incontinence.
- To prevent skin stripping from adhesives.
- To decrease friction damage over bony prominences.
- To form an extra barrier over intact skin in fragile areas as seen with Stage 1 pressure ulcers, suspected Deep Tissue Injury and blood blisters.
- To provide easier application by making it easy to handle, less mess and less sticking to the gloves
- To provide skin barrier protection while being transparent for visual skin inspection
- To provide an easy option for a patient to apply to skin in the home setting, i.e. products like the Dexcom Continuous Glucose Monitor contain an adhesive, the instructions for which mention the use of products such as "no sting, skin prep" for barrier protection.

| Product   | Size     | Reorder # | Units        |
|-----------|----------|-----------|--------------|
| StingFree | 1mL Wand | 11238     | 25 Wands/Box |
| StingFree | 3mL Wand | 11239     | 25 Wands/Box |
