

Elastomeric infusion pump

McKesson elastomeric infusion pumps feature a translucent design for easy visual inspection and are individually calibrated for accuracy. The pumps have a double cap system for enhanced sterility and are color-coded by flow rate for easy identification.

Portability and Ease of Use: Lightweight and battery-free, these pumps are perfect for patients on the move, ensuring comfort and convenience.

Accuracy and Safety: Individually calibrated for precise dosing, each pump features color-coded indicators by flow rate to assist in filling and reducing errors.

Patient and Pharmacy Benefits: With a simple, fixed flow rate design, there's no need for programming or IV poles, making them easy to use and dispose of after treatment.

Features and benefits

- Translucent design to allow visual product inspection during pharmacist verification
- Individually calibrated for accuracy
- Double cap to protect sterility during filling
- Color-coded by flow rate to assist in filling and reducing errors
- Air and 1.2-micron particle-eliminating membrane
- Sterile (EO)
- Non-pyrogenic
- Not made with DEHP
- Not made with natural rubber latex
