Re: Material Safety Data Sheet

To Whom It May Concern:

This letter is in response to your request for a Material Safety Data Sheet (MSDS). The general purpose of an MSDS is to provide appropriate warnings and safety information for products packaged in bulks. Unlike finished products packaged for retail sale, such information is not typically included or readily available on the bulk packaging. However, a number of products packaged for sale at retail contain information necessary to properly warn and advise the consumer are specifically exempted from the requirement to have MSDS. Food¹ or Dietary Supplements manufactured or distributed by Nature's Products in final retail packaging fall in this exemption.

Based on these exemptions under the federal OSHA Hazard Communication Standard, MSDSs are not required for the product requested. Product labels provide health cautions appropriate for the product and should be consulted for any concerns. If you have any emergency which requires additional guidance, please call 954-233-3300. If you have any questions regarding this issue, please do not hesitate to contact me.

Sincerely,

Wallace R. Fajardo
Director of Quality
Nature's Products Inc.

¹ The federal Occupational Safety and Health Act provide a specific exemption from the requirements for and MSDS for "Food... which are sold, used, or prepared in a retail establishment" 29 C.F.R. § 1910.1200(b)(6)(vi).
