Date: 5/9/2018

Product Name: Drugs of Abuse Test Panel

MFR Item #: 16-5125A3, 16-1145A3, 16-8105A3

Dear Customer:

OSHA requires SDS's **ONLY** for materials that: **a)** meet OSHA's definition of hazardous **and** are **b)** "known to be present in the workplace in such a manner that employees may be exposed under normal conditions of use or in a foreseeable emergency".

OSHA considers the item(s) referenced at the top of this letter as **"Articles"** and are considered not to be hazardous and therefore do not require an SDS.

An **"article"** means a manufactured item: (1) which is formed to a specific shape or design during manufacture (2) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (3) which does not release, or otherwise result in exposure to, a hazardous chemical under normal conditions of use. Any product which meets the definition of an "article," would be exempt from the requirements of the Standard.

Sincerely,

McKesson Brands
