RE: CPC# 1004

To whom it may concern:

The purpose of the OSHA Hazard Communication Standard (HCS) is to ensure that hazards of all chemicals produced by a manufacturer are classified and these classified hazards are communicated to employers and employees through a Safety Data Sheet (SDS).

As per 29 CFR 1910.1200(b)(5)(iii) and 29 CFR 1910.1200(b)(6)(vii) of the Occupational Safety and Health Administration (OSHA), any food or drug, as defined in the Federal Food, Drug, and Cosmetic Act (FD&C Act), is exempt from the HCS and does not require a SDS if it is in its final dosage form and/or it is packaged by the chemical manufacturer for sale to consumers in a retail establishment.

CPC's products are regulated by the FD&C Act and are subject to the labeling requirements as governed by the Act and the FDA. CPC's products are manufactured to their final dosage forms and/or are packaged for sale to consumers.

CPC is exempt from the OSHA requirements to provide an SDS for the finished product CPC #1004.

Please contact me if you have any further questions.
