

Protexis™ Latex Hydrogel

Sterile Latex Powder-Free Surgical Gloves
with Hydrogel Coating

Protexis™ Latex Hydrogel Surgical Gloves

Easy
to don.
Even easier
to wear.

Protexis™ Latex Hydrogel surgical gloves feature our exclusive hydrogel coating that makes them easy to don, while enhancing the second-skin comfort of latex.

Uncompromised protection

- Powder-free, natural rubber latex^{1,2,6}
- Balances tactile sensitivity with robust protection, even when double-gloving

Unparalleled performance

- Unique translucent yellow color – looks and performs like a second layer of skin
- Exclusive hand mold with an independent thumb design allows for an anatomical fit and more natural movement in the fingers, thumb and palm
- Proprietary interlocking, beaded cuff design reduces roll-down

Hydrogel: A difference you'll feel!

Hydrogel, also known as acrylic hydrogel polymer, is a hydrophilic coating chemically bonded to the interior of the glove, enhancing donning lubricity. This ensures that — wet or dry — our gloves glide on and conform to your hands for a soft, comfortable fit.

Protexis™ Latex Hydrogel

Sterile Latex Powder-Free Surgical Gloves with Hydrogel Coating

Backed by the expertise of Cardinal Health, Protexis™ Latex Hydrogel surgical gloves meet all relevant FDA and ASTM standards, including those for physical dimensions³, physical properties³ and freedom from holes⁴. Documentation and testing data are available upon request.

Material: Natural rubber latex coated with acrylic hydrogel polymer

Protein: Contains 50 micrograms (µg) or less of total water extractable protein per square decimeter (/dm²)^{1,5}

Powder-Free: Powder residue limit < 2.0 milligrams (mg)²

Dimensions (target)

Length: 12 in / 305 mm

Thickness

- Finger: 10 mils / 0.25 mm
- Palm: 9 mils / 0.23 mm
- Cuff: 7 mils / 0.18 mm

Freedom from holes: 0.65 AQL

Properties (before aging)

Tensile Strength: ≥ 24 MPa

Stress @ 500% elongation (modulus): ≤ 5.5 MPa

Ultimate Elongation (elasticity): ≥ 750%
