

# REMEDY PHYTOPLEX<sup>®</sup> BARRIER CREAM CLOTH STUDY

## An Evaluation and Comparison of Skin Protectant Cleansing Cloth Performance

### INTRODUCTION:

In an effort to increase efficiency and consistency of incontinence care, there has been increased interest in, and use of, multi-purpose cleansing cloths.

### OBJECTIVE:

Perform a study to quantify and compare the cleaning properties of the two leading multi-purpose cloths.<sup>1</sup>

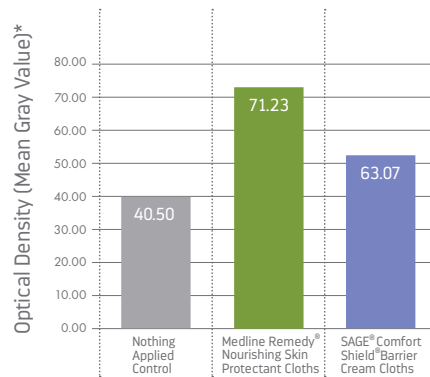

### METHODOLOGY

Abdominal-Ventral swine skin flaps, used in similar skin product studies<sup>(1,2)</sup>, were chosen for this in-vitro test. Each was given a 5cm test strip line using a black chisel marker, then wiped 4 times with a cloth. Afterwards, each site was digitally scanned and processed to quantify cleansing performance as a Mean Gray Value\* (A computerized scan to measure cleansing efficacy).

\*This describes the residual gray ink removed during cleansing as a measure of efficacy.

### RESULTS

As the graph below shows, the results suggest Medline Remedy Phytoplex<sup>®</sup> Barrier Cream Cloth were significantly ( $p < 0.05$ ) better in cleansing the marker ink.

Remedy Phytoplex Barrier Cream Cloths  
**performed significantly better**  
over the leading competitive cloths

# CLEANING EFFICACY

## SAMPLE PHOTOS OF RESULTS

Item No.	Description	Pkg.
MSC092508	Remedy 4-in-1 Barrier Cream Cloths	8 cloths/pk 32 pks/cs
MSC092507	Unscented Remedy 4-in-1 Barrier Cream Cloths	8 cloths/pk 32 pks/cs
