

# Universal Tube Securement Devices

Holding the line on exceptional care.

Unsecured lines are vulnerable to accidental pulling, which may disrupt care delivery and cause discomfort or injury. From **IV lines** to **feeding tubes** and everything in between, our Universal Tube Securement Devices provide worry-free tube attachment and superior patient comfort.

## Secure, Comfortable and Versatile.

Available in three sizes: Pediatric, Small and Medium, all packed with features:

- Adhesive and hook-and-loop backing offer great securement against accidental lifting, pulls and line pistoning movement
- Simple to apply and adjust
- Made from soft, non-woven material for optimal patient comfort
- Fits any tube, line or catheter from 1.5mm to 8mm in diameter

### Great for:

- IV lines
- Feeding tubes
- Bedside monitoring equipment
- Surgical drains (size medium recommended)
- Catheter tubes (size medium recommended)

## Ordering Information

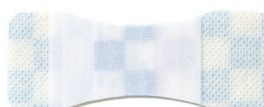

Item No.	Description	Pkg.
DYND7600P	Pediatric	100/bx
DYND7600S	Small	100/bx
DYND7600M	Medium	100/bx

Pediatric  
DYND7600P

Small  
DYND7600S

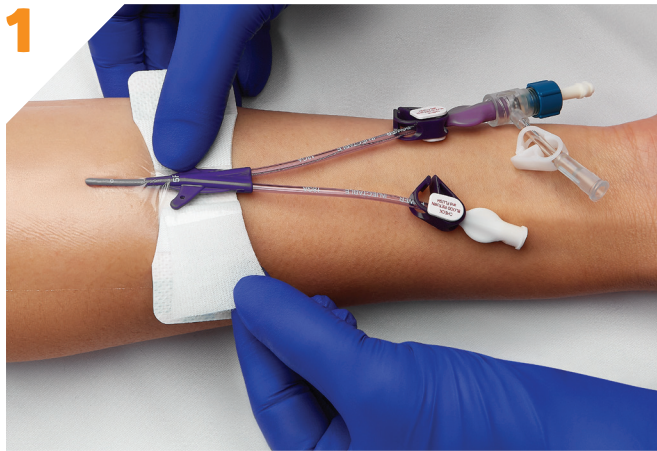

Medium  
DYND7600M

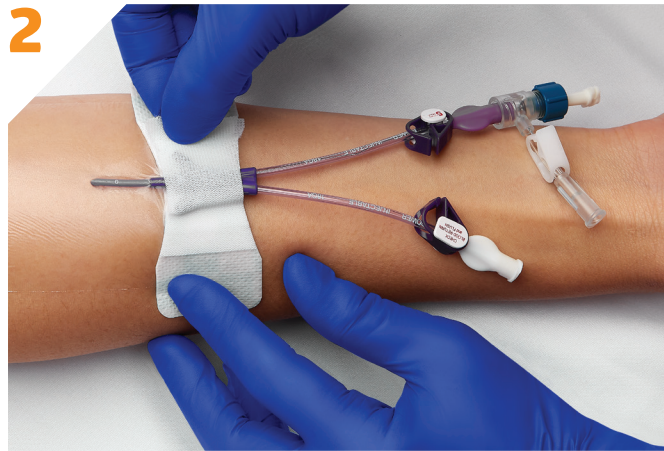

Helps prevent accidental pulling, which may disrupt care delivery and cause discomfort or injury

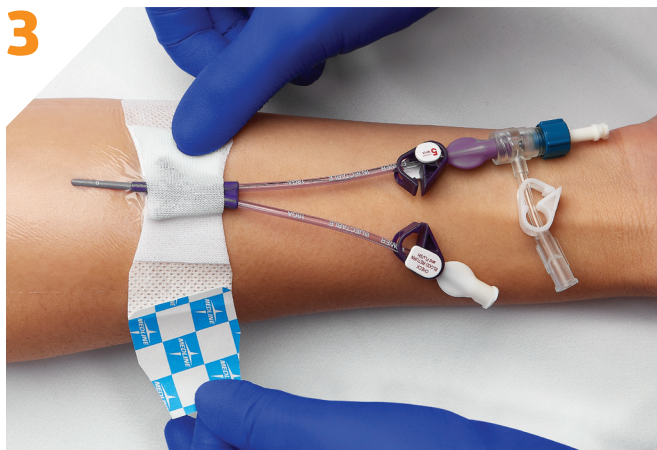

## Apply in four easy steps.

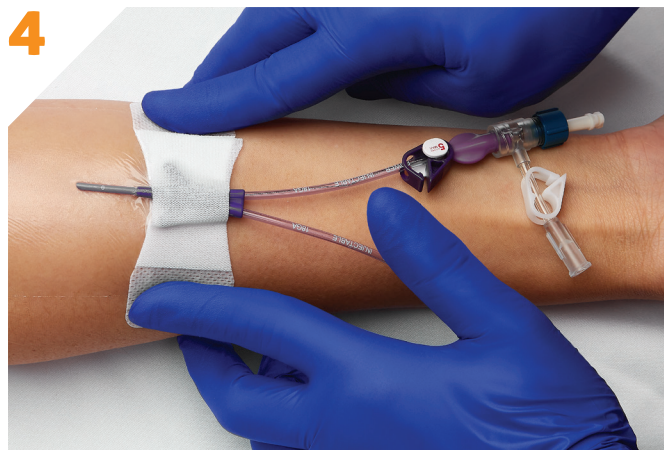

Prep the patient's skin per your hospital's protocol. Ensure the area is clean and dry. Open top fabric strap and remove backing. Slide under catheter, line or tube.

Firmly close top fabric strap over catheter, line or tube.

Holding the tubing in place, remove the adhesive backing on bottom of the securement device.

Press down and around edges, smoothing against patient's skin, similar to a bandage.
